CATALOG

CONTENTS

The CRKT headquarters located in Tualatin, Oregon USA.

Hello! Thank you for your continued support. We continue to work hard every day to do our very best in bringing you the absolute best knife and tool products—regardless of the suggested selling price. Whether it is our new “Hammond FE 9™”, or the new “Eat’N Tool® XL”, we use the best designers, materials and manufacturing methods to deliver you optimum value.

More Excitement! If you are familiar with Columbia River Knife & Tool, you have come to anticipate exciting new designs and technologies from us each year. And, this year we are excited for you to see our more than 40 new models for 2013. That’s right, from basic foundational products like our new “Ryan Johnson T-Hawks” to the innovative new “Onion Survival Para-Saw™”—it’s going to be another banner year for design and innovation from CRKT®!

It’s a Commitment. Striving year after year to continue bringing you useful and affordable quality tools is more than a job to us. It is personal. We remain an American owned company, and are thankful to our many customers who have supported us, which in turn continues to allow us to keep growing here at home creating more jobs. We realize you have options when it comes to choosing which knives or tools to purchase, and everyone here at CRKT® continually strives to remain one of your *best* options.

Get Involved! CRKT® is actively involved in the knife community and we remain vigilant in practicing responsible citizenship when it comes to “Man’s Oldest Tool”. Whether directly, or through industry associations like AKTI, we make the time and resources available to press enforcement agencies for fair interpretation of existing laws and assist at all levels of government to clarify and amend existing laws to accurately reflect the needs of all knife & tool users. It is everyone’s responsibility to ensure the right to own these essential tools is protected for all honest, hardworking people for generations to come. We continue to work diligently to ensure that the next generation of knife and tool users gets educated on how to carry, operate and use them properly. Working with the “Now Generation” to see that they pass along the legacy of using knives and tools to their children and grand-children, rather than idly letting them slip away or be taken from their lives.

Thank you for your interest in CRKT® products, and we are sure you will enjoy using our products as much as we have enjoyed bringing them to you.

Rod Bremer, President CRKT

INNOVATION. QUALITY. VALUE.

THREE WORDS THAT MEAN AS MUCH TO US AS THEY DO TO YOU. IT'S WHAT WE STRIVE FOR IN EVERYTHING WE DO. ALWAYS HAVE. ALWAYS WILL.

Innovation has been a critical factor in our growth, and this year is no exception. Each year it seems it would get tougher and tougher to keep pushing the positive development of knives and tools, but the many talented knife designers keep pleasantly surprising us with their purpose minded creations. Expect to see a surprising variety of new designs from our current award-winning designers, and from new designers as well.

This Product Catalog includes the many proven products that make up our current product line. These products are available today at your local retailer, or at their distributors, or from our warehouse ready for immediate shipping.

THE TECHNOLOGY

IKBS™ The Ikama Karth bearing system [IKBS] creates an amazing folder pivot that is lightning fast, smooth, rigid and also adjustable.

NIRK™ As simple and rugged as a folding knife can be, made from two pieces of stainless steel, yet offering full lockback features.

ExiTool® Russ Kommer's emergency seat belt cutter clips onto any seat belt, and also has a window breaker and L.E.D. flashlight.

Free Range® Hunter Double injection molding creates a handle with both hard and soft areas within the grip to enhance hold and stabilize overall comfort.

Crossover® It's both camp shears and kitchen knife. Just rotate to separate the two components and press in the flexible handle guard.

Veff™ Flat Top Serrations Another improved cutting efficiency serration developed by Tom Veff, and available exclusively to CRKT.

Veff™ Serrations Many CRKT models feature exclusive patented serrations developed by Tom Veff for exceptionally fast, smooth cutting.

Swindle™ Clip A Ken Onion designed pocket clip is positioned on the side of the knife, and is spring tensioned to provide an improved "clipped in" hold in a pocket or pouch.

Williams Flashlights Mode options/changes allow you to readily switch from high and low power beams as well as a flashing strobe mode for personal safety use.

M16® -ZLEK The Carson Flipper features a seatbelt and strapping cutter. And tungsten carbide window breaker.

SAFETY & ACTUATION

FOLDER SAFETY SYSTEMS. CRKT has led the way in developing improved lock and safety systems for folding knives. Our goal is to provide the optimum level of safety and security for each knife's intended use. Before buying any CRKT knife, the buyer should be sure that it is suited to the intended use.

Traditionally, pocket knives have been designed for over a century with a simple slip joint. They are intended for very light duty while cutting away from the user, such as sharpening pencils, trimming clippings, and opening cartons. An example is the **Liong Mah Design #5 or #6**. For more arduous cutting tasks, modern folders feature locks which hold the blade firmly in the open position. CRKT offers many of these lock styles, including locking liners, frame locks and lock backs.

LAWKS® Many CRKT folders feature the patented Lake And Walker Knife Safety system. This system converts folders into virtual fixed blades when the blade is opened and locked, and when the LAWKS lever is slid forward.

To fold the knife, simply slide the lever back, and release the liner.

AutoLAWKS™ CRKT is the only manufacturer to offer our exclusive automatic version of the LAWKS system. A strong internal spring actuates the LAWKS system automatically when the blade is opened and locked. As with all CRKT folders, one-hand opening is easy, and with little practice, closing a folder with AutoLAWKS is easy too. Because it is fully automatic, we believe that the AutoLAWKS safety system is the most secure mechanism available for folders.

L.B.S.™ Ron Lake, father of the modern folding knife, has developed his patented safety system for lock-back folders. To lock the blade, either in open or closed position, just slide the small L.B.S. button forward.

FOLDER ACTUATION SYSTEMS. We understand that many knife users today want fast one-hand opening in their folders. CRKT models have traditionally featured convenient, prominent thumb studs, and many models have blade flippers to aid opening. For those who want a faster-opening action, our patented **OutBurst®** assisted opening system is the answer. It instantly springs the blade fully open after you have manually opened the blade approximately 10 to 30 degrees. The OutBurst spring

holds the blade securely in place until you initiate opening. These assisted opening knives meet federal standards for folders, as confirmed by recent federal legislation. On many models, we have combined the OutBurst system with our locking and actuation mechanism, to give a new

level of ease of operation and security when the blade is closed.

Fire Safe® This patented system relies on a pin at the locking liner. The actuation mechanism is incorporated into two different opener styles. One is a spring-loaded button on the **thumb stud**; you open a Fire Safe® thumb stud equipped folder by pressing the thumb stud button, to release the locking liner and pin. The second style is a

thumb disc; you open a Fire Safe® thumb disc equipped folder by pressing the thumb disc button, to release the locking liner and pin. In either style, you then nudge your thumb outward, and the OutBurst® assisted opening mechanism takes over and propels the blade into the open and locked position. It is the combination of pressing and nudging the blade, which helps prevent accidental opening.

Carson Flipper. This ingenious system has revolutionized the way folding knives open. With a simple finger pressure of the "flipper", which is incorporated into the blade, the blade flips open and locks in place. Once open, the flipper works great as an added blade guard as well. The flippers are designed into a variety of shapes and sizes.

NIRK™ TIGHE & NIRK™ TIGHE 2

TIGHE/KLECKER DESIGN

EDGE

A Marvel of Mechanics Meets a True Mastery of Metal Machismo. Yep, Pretty Much Like That.

Once your eyes lock on to the artistry in the skeletonized handle, you begin to see the true purity of the NIRK™ Tighe form. Brian Tighe and Glenn Klecker reinterpreted the Klecker NIRK™ folder with stainless steel being stamped and machined into a very dynamic, functional design. The steel frame is not only visually exciting, but offers a formidable cutting tool handle as well. Glenn's patent pending integral lockback mechanics, the "Klecker Lock", are such that, the tighter you grip the handle—the stronger the blade lock-up. Brian's drop point blade design flows nicely from the handle shape, and its subtle recurve along the cutting edge is a nice touch as well. And to keep the blade action smooth, a specially caged mini ball bearing system affords fast and smooth operation when used with the flipper. A custom removable stainless steel clothing/gear clip is provided. Select from either the NIRK™ Tighe or the smaller sized NIRK™ Tighe 2 to get the ultimate in mechanical simplicity masterfully designed into a knife form that takes metal work to a whole new level.

Specifications

NIRK™ TIGHE

5250: Razor-Sharp Cutting Edge
Blade: Length: 3.875" [98 mm]
Thickness: 0.121" [3.1 mm]
Steel: AUS 8, 58-59 HRC
Closed: Handle length: 5.25" [133 mm]
Open: Overall length: 9.125" [232 mm]
Weight: 5.1 oz. [145 g]

NIRK™ TIGHE 2

5240: Razor-Sharp Cutting Edge
Blade: Length: 3.25" [82.6 mm]
Thickness: 0.11" [2.8 mm]
Steel: AUS 8, 58-59 HRC
Closed: Handle length: 4.25" [108 mm]
Open: Overall length: 7.375" [187 mm]
Weight: 3.3 oz. [94 g]

U.S. Patents Pending

The NIRK™ Tighe can be opened quickly by pressing the flipper tang. Opening is fast due to ball bearings at the pivot.

The entire frame is coated in blue titanium nitride for corrosion resistance. Then exterior surfaces are satin polished.

“INTELLIGENT DESIGN, PURE INNOVATION, AND ALL BUSINESS.” NIRK™ TIGHE

The uniquely engineered lockback mechanism, the “Klecker Lock” offers reliable, solid lockup.

Geometric shaped thumb-hole blade opener for single hand opening.

MY TIGHE™

TIGHE DESIGN

A Bold Design with a Multitude of Striking Features and Muscle from the Distinctly Stylized Scales, Robust Steel Frame to the Ambidextrous OutBurst® Assisted Opener.

The design talents of Brian Tighe are apparent from the first time you pick up the My Tighe™. Molded scales are purposefully sculpted to help fill the grip nicely for a solid feel in the hand, and its contemporary blade shape ebbs and flows with spine facets, hollow grinds and a recurve cutting edge for the performance minded knife enthusiast. So if you are looking to stand out in a crowd for all of the right reasons, the My Tighe™ makes a great wingman.

[My Tighe™]

1090 (MSRP \$94.99)

1091 (MSRP \$94.99)

1091K (MSRP \$99.99)

A removable steel pocket clip makes knife carry simple and convenient.

Model 1090

A slight recurve blade grind in the cutting edge helps to increase cutting efficiencies.

Specifications

MY TIGHE™

- 1090:** High Satin Blade, Bead-Blast Frame, Razor-Sharp Cutting Edge
- 1091:** Combined Razor-Sharp & Veff Serrated Cutting Edge
- 1091K:** Black Blade and Frame, Combined Razor-Sharp & Veff Serrated Cutting Edge
- Blade:** Length: 3.625" [92 mm]
Thickness: 0.124" [3.1 mm]
Steel: 1.4116, 55-57 HRC
- Closed:** Handle length: 4.50" [114 mm]
- Open:** Overall length: 8.125" [206 mm]
- Weight:** 5.6 oz. [159 g]

U.S. Patent No. D559,939

Available in clompack as 1091C.

EDGE

The OutBurst® assist mechanism is easily removed or replaced, held in place by a single setscrew.

Exclusive Veff™ Serrations are angled and scalloped to cut quickly and smoothly through rope, cord, and vegetation.

MINI MY TIGHE™

TIGHE DESIGN

A Slightly Downsized Version of the My Tighe, Makes The Most of Everything in a Mid-Sized Folder.

The Mini My Tighe is a great personal carry choice both for its stellar looks as well as its comfortable size. Knife designer Brian Tighe repropotioned the larger My Tighe™ in every detail to maintain the overall design balance throughout. The frame-lock folder has an open build frame of stainless steel with molded glass-filled nylon handle scales that are uniquely shaped to fit your natural grip pattern. Our patented OutBurst® assisted opening mechanism combined with dual ramped thumb studs allow knife models to be readily opened single handedly with either hand.

1092 [MSRP \$89.99]

1093 [MSRP \$89.99]

1093K [MSRP \$99.99]

Specifications

MINI MY TIGHE™

- 1092:** High Satin Blade, Bead-Blast Frame, Razor-Sharp Cutting Edge
- 1093:** Combined Razor-Sharp & Veff Serrated Cutting Edge
- 1093K:** Black Blade and Frame, Combined Razor-Sharp & Veff Serrated Cutting Edge
- Blade:** Length: 3.0" [76 mm]
Thickness: 0.120" [3.0 mm]
Steel: 1.4116, 55-57 HRC
- Closed:** Handle length: 3.73" [95 mm]
- Open:** Overall length: 6.5" [165 mm]
- Weight:** 3.8 oz. [108 g]

U.S. Patent No. D559,939

Available in clompacts as 1093C and 1093KC.

[Mini My Tighe™]

Molded glass filled nylon scales are dimpled for added grip tread.

Model 1093K

Veff™ Serrations add the extra edge for readily cutting fibrous materials like webbing, rope or netting.

EDGE

The frame lock engages solidly with the blade for reliable, secure lock up.

The thick molded handle scales are a well conceived addition to overall grip.

RIPPLE™ ALUMINUM

ONION DESIGN

The Stylish Lightweight Onion Folder is Making Waves Again... It Just Got a Bit Lighter!

Get contemporary styling, smooth flowing profile and all around fresh design in the Ripple™ aluminum—at a near “barely there” weight that won’t slow you down. The aluminum handles are anodized black and then hand buffed to expose the silver aluminum, creating an attractive, randomized pocket worn look to the handles. Its modified drop point blade is easy to open single handedly with the blade flipper. The Ripple™ aluminum folder is an ideal overall low profile, lightweight every day carry choice.

 Weight: 1.4 oz. [40 g]

EDGE

EROS™

ONION DESIGN

A New Breed of Folder, This "Gentleman's Tactical" is as Functional as It is Visually Striking.

Full-on contemporary form and function is readily apparent in the Eros™ design from custom knife maker Ken Onion. Inspired by organic shapes and modern engineering, the Eros™ minimizes form while maximizing function through the process of material elimination. Visually striking handles are CNC machined of titanium to grip the hand like a gear shifter in a high-performance sports car. The slender blade shape, high hollow grind and swedged top edge have been coined as a "Ken Onion drop-point", but you may just want to call it "VERY cool with an edge".

The Ikoma Korth pivot ball-bearing system gives silky-smooth opening action with great rigidity.

The Eros™ features a striking and unusual Ken Onion custom stainless steel pocket clip.

SWINDLE™

ONION DESIGN

A Refreshing Design That Goes Beyond the Norm While Still Offering Plenty of Edge.

Who better to “cheat” the rules of typical folding knife design other than renowned knifemaker Ken Onion, whose new Swindle™ design flows from tip to tail with the slightest of *uphill* curve. It innocently tricks the eye at first sight, but once in the hand the functional subtleties become apparent. The frame lock mechanics and flipper style opener are neatly tucked into a stainless steel handle, and the hollow ground, modified wharncliffe blade moves with ease thanks to the smooth IKBS™ pivot system. For carry, Ken went the extra mile with a clip design flowing from the tail end, back over the spine. It’s tensioned lever securely clips into the pocket and “nests” the knife for comfortable carry. So, if you are wanting a classy, slim carry knife that “bends” the rules in your favor, the Swindle™ is a good bet.

K240XXP [MSRP \$59.99]

K241XXP [MSRP \$79.99]

Specifications

SWINDLE™

K240XXP: Razor-Sharp Cutting Edge with Flat Handle

Thickness: 0.12" [3.1 mm]

Steel: 12C27 Sandvik, 59-61 HRC

Closed: Handle length: 4.25" [107 mm]

Open: Overall length: 7.5" [191 mm]

Weight: 3.3 oz. [94 g]

The flipper style opener makes blade access simple and quick. Frame lock mechanics provide safe use.

The carry-clip design is very unique and adds a custom flair to the knife.

Pocket-clip is “tensioned” to provide added carry security.

Model K240XXP

Bead blast finish, stainless steel handles are available in smooth, or grooved surfaces.

Model K241XXP

A hollow ground, modified wharncliffe blade offers a fine, razor-sharp cutting edge.

EDGE

SHENANIGAN™ & SHENANIGAN™ Z

ONION DESIGN

In Ken Onion Style, It's a Straight Up, No Nonsense Folder Design That Lives Up To The Old Adage of Less Is Truly More.

We asked renowned knifemaker Ken Onion to design a great all-around functional sport knife with a locking liner for those folks that appreciate clean lines and simple mechanics. And when you get one of these in your hands, we are sure you will agree that he pegged the Shenanigan™ design spot on. For openers, a press of the blade flipper is all it takes. And blade design is in classic Ken Onion profile of a modified drop point, which incorporates a slight recurve and swaged top edge. Grab hold of the handle with its smooth contours, relaxed finger groove and swelled palm grip, which are a performance-minded dream. When it comes to your next knife choice, the Shenanigan™ should be one to consider.

Soft, molded grip insert is checkered for added grip and comfort.

Stainless steel pocket-clip makes every day carry simple and convenient.

You get plenty of utility in what has become the Ken Onion Signature blade style.

Open: Overall length: 8.25" [210 mm]
Weight: 3.7 oz. [105 g]

Available in clompacts as K480KKPC and K480KKSC.

Here's a classic Ken Onion sport and work knife blade: drop point with a slight recurve, swaged top.

To open instantly, just press the flipper. Lubrous washers and bronze bushings at the blade pivot give buttery smooth action.

SAMPA™ & CARAJAS™

IKOMA DESIGNS

A Pair of Racey Designs to Excite the Senses and Satisfy the Need for Reliable Cutting Performance.

Brazilian Flavio Ikoma has applied his design talents to creating these robust folders, each with their purposefully shaped handle scales that conform to your grip and offer solid holding qualities. The Sampa™ uses cold-forged aluminum scales while the Carajas™ black G10. Utility-driven blade shapes are readily deployed with use of the flippers, and the IKBS™ pivot system defies gravity with velvety smooth movement. Form and function reign supreme in both the Sampa™ and Carajas™ folders.

ENDORSER™

CRKT® DESIGN

Here's One of Those Knives That is Real Tough to Pass Up—Thanks to a Solid “No Nonsense” Design.

Need a new knife to call your “ol’ reliable”? This straight forward folder is both fundamentally sound and physically fit for today’s knife enthusiasts. We put the utility driven, drop-point blade shape into a progressively functional handle design complete with finger grooves and slight palm swell. Handles are G10 with blackened stainless steel liners. The patented* Fire Safe® thumb-stud opener secures the blade at the ready for when it’s needed, and our patented OutBurst® assisted opening system makes blade opening quick. The Endorser™ employs a locking-liner for effective lock up and it’s also easy to close when needed. Some knives don’t need any hard sell to stand out—they just speak for themselves.

1105 [MSRP \$59.99]

1105K [MSRP \$59.99]

Specifications

ENDORSER™

- 1105:** Satin Blade
Razor-Sharp Cutting Edge
- 1105K:** Black Oxide Blade
Razor-Sharp Cutting Edge
- Blade:** Length: 3.18" [81 mm]
Thickness: 0.100" [2.5 mm]
Steel: 8Cr14MoV, 58-59 HRC
- Closed:** Handle length: 4.17" [106 mm]
- Open:** Overall length: 7.31" [186 mm]
- Weight:** 3.2 oz. [91 g]

*U.S. Patent 7,918,028

Multilayer black and brown G10 with bead blast finish handle scales.

Removable, steel clip makes pocket carry simple with easy, quick access.

Finger grooves help to “nest” the knife into the hand for reliable grip.

Performance shaped drop point blade with hollow grind.

EDGE

Model 1105K

Stainless steel liners provide the solid foundation for the locking-liner as it engages with the blade tang for secure lock-up.

Liners protrude from under the handle scales to create added tactile grip and overall knife assembly integrity.

ENTICER™

MJ LERCH DESIGN

An Ultra-Lightweight, Low-Profile Knife That Still Comes Up Big On Performance.

Lighten your load without sacrificing features! The Enticer™ design from MJ Lerch comes in at a whopping 2-ounces, and yet wields a 3.24-inch blade suitable for a multitude of cutting tasks. Blade opening is quick with the patented* Fire Safe®, which has been incorporated into a thumb-disk for the first time. Simply depress the disk while pressuring the blade open, and the system releases the blade fully open. Add that to our patented OutBurst® assisted opening system and you have safe, reliable and quick knife opening. MJ's Enticer™ features a drop point blade and molded, glass filled nylon handle scales with a locking liner. With so much knife weighing in at so little... you might just be tempted to put one in every gear bag.

IGNITOR®

CRKT® DESIGN

With a Name Like That to Live Up To, We Had to Pull Out All of the Stops. So We Did.

Getting things started in a big way is the patented OutBurst® assisted opening coupled with the patented² Fire Safe® thumb-stud actuator. This tandem of technology allows easy, fast and safe single hand blade actuation. The Ignitor® handle design is solid and formidable so you can make full use of the 3.38" blade length without having to over grip to compensate even in tough cutting tasks. Another key feature is the option of our patented¹ Veff™ Serrations, which are superior for fast cutting of all things fibrous. The Ignitor® series is available in several configurations so you can choose the one that best suits your preference. So, don't just settle for satisfying your knife needs—ignite them!

[Ignitor®]

Removable stainless steel pocket-clip makes every day carry simple and convenient.

Machined G10 scales are very tough and offer secure grip.

Veff™ Serrations are ideal for rope, webbing and fibrous material cutting.

2. U.S. Patent No. 7,918,028

Available in clompacts as 6850C, 6855C, and 6865C.

The OutBurst® assisted opening mechanism cannot be actuated until you firmly press the Fire Safe® button and nudge it.

The lightweight G10 scales are CNC machined to provide grip while also revealing the secondary color layer.

THE NATURAL®

CRAWFORD DESIGN

Near Custom Like Features, Finishes and Materials Exemplify This Signature Design From this Father and Son Knife Making Duo.

Pat and his son Wes have designed many great knives over the years and the Natural series is no exception. Stylish tradition, seasoned with just the right amount of modern engineering make for an excellent choice in everyday carry function. The Crawford styled "Marauder clip-point" blade springs into action with the patented OutBurst® assisted opening with use of ambidextrous thumb studs. And, the generous finger grooves in the handle offer ample grip for even the toughest cutting tasks. The file worked back spacers, "jeweled" finish steel surfaces and overall detailed profiling truly help to dress up any pocket that you choose to clip a Natural® into.

Model 7080W

LIONG MAH DESIGN

#5 & #6

MAH DESIGN

Here's a Stealthy Compact Carry That's Big On Blade.

Designer Liong Mah has a purity to his designs, which transcends old style qualities with modern technologies and materials. The #5 and #6 feature Mah's deep, hollow ground blade style that provides a stout cutting edge from tip to choil and finger guard. Broadly shaped G10 scales use finger grooves and surface profile to afford versatile grip even with its desirably small stature. You will find the slip joint locking mechanism a refreshing throwback in a contemporary design. And the fob/tether is a nicely added benefit. For the knife user who wants maximum blade in a "low-drag" carry, these are it.

6520 [MSRP \$49.99]

6521 [MSRP \$49.99]

Specifications

LIONG MAH DESIGN #5

6520: Satin Blade
Razor-Sharp Cutting Edge
Blade: Length: 2.77" [70 mm]
Thickness: 0.16" [4 mm]
Steel: 8Cr14MoV, 58-59 HRC
Knife: Overall length: 6.50" [165 mm]
Weight: 3.5 oz. [100 g]

LIONG MAH DESIGN #6

6521: Satin Blade Combined
Razor-Sharp & Veff™ Flat Top
Serrated Cutting Edge
Blade: Length: 2.77" [70 mm]
Thickness: 0.16" [4 mm]
Steel: 8Cr14MoV, 58-59 HRC
Knife: Overall length: 6.50" [165 mm]
Weight: 3.5 oz. [100 g]

G10 handle scales are slightly contoured and broad based for versatile grip.

Stainless steel carry clip may be moved to either handle side.

An oversized nail-nick opener ensures easy, quick access for any size hands.

Model 6520

The drop point blade style provides sizable utility.

For those that need added cutting utility, the Veff™ Flat Top serrations are available in the #6.

Barrel backspacers add a custom look to overall detailing. And, a corded fob enhances grip security.

EDGE

PERSIAN FOLDER

JERNIGAN DESIGN

As Functional as it is Visually Exciting.

Anyone familiar with Steve Jernigan's custom knives, knows that he is a master of blending curves, functional designs and stylish looks. And his Persian folder design does exactly that in this latest CRKT® offering. Its clip point blade shape extends your cutting edge while still offering a fine tip for detail oriented tasks. The grooved, stainless steel handle is first titanium nitride coated gold color, and then surface ground for an attractive two-tone finish. Matching grooved black G10 handle overlays are applied and create a contrasting bolstered look. The overall shape fills the grip nicely, and feels well balanced for ease of cutting control. If you are looking to put a little culture into your every day carry, the Persian Folder is what you're looking for.

7470 [MSRP \$49.99]

Specifications

PERSIAN FOLDER

- 7470: Satin Blade
Razor-Sharp Cutting Edge
- Blade: Length: 2.71" [69 mm]
Thickness: 0.11" [2.7 mm]
Steel: 8Cr14MoV, 58-59 HRC
- Closed: Handle length: 3.61" [92 mm]
- Open: Overall length: 6.30" [160 mm]
- Weight: 2.2 oz. [62 g]

Comes with soft cloth bag/pouch with draw string closure.

The frame lock mechanism safely secures the blade fully open, and can be easily actuated to close the blade when desired.

Full-length stainless steel frame is titanium nitride color coated, which creates a top-shelf look.

The grooved handle pattern in the all black G10 scales provides a functionally tactile surface while enhancing the overall appearance.

The swedged blade top creates a "sharper" tip.

The partial scales create an attractive bolstered look.

K.I.S.S.[®] & P.E.C.K.[™]

HALLIGAN DESIGN

POCKET

A CRKT Fan Favorite— It's The Original Design in Folding Knife Simplicity and High-Value Pocket Utility.

The revolutionary K.I.S.S.[®] [or Keep It Super Simple] design by Ed Halligan has created quite the following over the years. Its ultra simplistic two-piece construction and overall purity of form and function are tough to beat. Its unique Tanto-inspired blade shape has a sharp Chisel ground cutting edge that stows snug against the frame in the closed position. A thumb stud is used to one-hand open the blade, and the integral frame lock provides a positive lock up. Another great feature of the K.I.S.S.[®] knife is the pocket/money clip giving you plenty of carry options and uses. For a diminutive size, the P.E.C.K.[™] [or Precision Engineered Compact Knife] at less than 1 oz. in weight, is a natural for key rings, change pockets or purses. Ed incorporated a Razor-Sharp Wharncliffe blade style with utility enough for hundreds of daily tasks. You are sure to love both of these designs based solely on their ingenuity and usefulness, but then when you see the quality and consider the value, it's a must have.

K.I.S.S.® ASSist™

CRKT® DESIGN

It's the Culmination of Some Ingenuity and the Already Popular Ed Halligan K.I.S.S.® Knife Design Resulting in Some Dressed Up—Added "Kick".

People like to have options, which is exactly why we chose to re-engineer the original K.I.S.S.® knife and add to it our patented OutBurst® opening and patented Fire Safe® mechanism. This powerful combination gives you a compact, fast opening with the desirable safety feature to back it up. Blades are available in several configurations and are high satin finished to contrast against the bead blast frame with its stylish accretments of carbon fiber, molded black glass filled nylon blade guard and gold color finished pivot hardware. So, even if you have never been "KISSed" before, or even if you have, the assist version makes a great everyday carry!

The OutBurst® assisted opening mechanism cannot be actuated until you firmly press the Fire Safe™ button and nudge it.

The K.I.S.S.® ASSist™ mechanism uses a unique blade cam and integral frame spring system which is patent pending.

DRIFTER & PAZODA™

CRKT® DESIGNS

Here are Two Knife Models That Offer Great Performance and Great Value. Take Your Pick or Go For Both!

The **Drifter** comes in either a locking liner or stainless steel frame-lock folder. Blade design is utility minded and features a dual thumb stud opener for single-hand function. From there, a nicely sized and profiled handle shape makes working through cutting tasks easy. The **Pazoda™** is a stylish frame-lock folder that comes in two size options. Here again is a blade design with great potential, and the blades are coated with gray titanium nitride for a classy look as well as corrosion protection. And, the oval blade hole works nicely for single hand opening. Its stainless steel handle balances well with the blade size, and is detailed for a nice look. Both sizes make a great choice for everyday utility. Both the Drifter and the Pazoda™ are excellent choices for gifts or premiums. Generous, flat surface areas and value pricing make personalizing or logo branding simple and affordable.

FOLTS DESIGN

The Key to Any Great Everyday Use Knife is Control. And These Small Fixed Blade Designs Offer Some of the Best We Have Ever Seen.

Custom knifemaker and metalworker Alan Folts really knows how to get the most into a small fixed blade design. The S.P.E.W.™ (Small Pocket Everyday Wharncliffe), is a slimmed down, G10 scaled design for easy carry and all around blade utility. His Minimalist® knives are small and lightweight knives, which offer surprising comfort and control, thanks to the unusual geometry of the full-tang blades, aided by three finger choils, friction grooves for the thumb, hand-contoured resin impregnated fiber scales, and a braided fob. Four uniquely different blade style offerings let you pick your preference. It is tough to argue against the value of having a knife along with you, especially ones as versatile and comfortable as either the Minimalist® or S.P.E.W.™.

[Minimalist®]

The braided fob adds grip surface and helps with drawing the knife from the sheath.

Handle grooves offer solid grip and blade control.

Custom fit, formed sheath secures the knife while offering a variety of carry styles.

Model 2388

The Minimalist fits the hand perfectly, giving a surprising level of comfort and control in a lightweight fixed blade.

2385 [MSRP \$36.99]

2386 [MSRP \$36.99]

2387 [MSRP \$36.99]

2388 [MSRP \$44.99]

Specifications

MINIMALIST® WHARNCLIFFE

2385: Razor-Sharp Cutting Edge
Blade: Length: 2.0" [51 mm]
Thickness: 0.100" [2.4 mm]
Steel: 5Cr15MoV, 55-57 HRC
Knife: Overall length: 5.00" [127 mm]
Weight: 1.1 oz. [31 g]

MINIMALIST® TANTO

2386: Razor-Sharp Cutting Edge
Blade: Length: 2.125" [54 mm]
Thickness: 0.110" [2.8 mm]
Steel: 5Cr15MoV, 55-57 HRC
Knife: Overall length: 5.13" [130 mm]
Weight: 1.6 oz. [45 g]

MINIMALIST® BOWIE

2387: Razor-Sharp Cutting Edge
Blade: Length: 2.125" [54 mm]
Thickness: 0.108" [2.7 mm]
Steel: 5Cr15MoV, 55-57 HRC
Knife: Overall length: 5.13" [130 mm]
Weight: 1.6 oz. [45 g]

MINIMALIST® SHEATH

Material: Glass-Filled Nylon
Length: 2.5" [64 mm]
Width: 1.80" [46 mm]
Weight: 0.5 oz. [14 g]

S.P.E.W.™

2388: Razor-Sharp Cutting Edge
Blade: Length: 3.00" [76 mm]
Thickness: 0.1" [2.5 mm]
Steel: 5Cr15MoV, 55-57 HRC
Knife: Overall length: 6.25" [159 mm]
Weight: 3 oz. [85 g]

S.P.E.W.™ SHEATH

Material: Kydex
Length: 3.75" [95 mm]
Width: 2.125" [54 mm]
Weight: 1.1 oz. [31 g]

Available in clompacts as 2385C, 2386C, 2387C and 2388C.

NOTE: Layered resin impregnated fiber components may vary in pattern due to hand finishing.

LAKE 111™-Z

LAKE DESIGN

A Simple, Reserved Folder Design That Offers Plenty of Utility and a Unique, Added Safety Mechanism for Personal Piece of Mind.

A throwback of sorts to form and function, this Ron Lake design reinvents the lock back folder with the addition of his patented L.B.S.™ safety—locking the knife open or closed. The time honored lock back mechanism is crafted to a solid fit and finish for smooth function throughout single hand actuation opening and closing. The classic drop point blade style of the Lake 111™-Z is a great all-around choice especially with its stronger flat ground bevel. Low profile, molded scales offer nice tactile grip and comfortable carry in your pocket or denim belt sheath depending on model. For straight up versatility and some extra added safety, the Lake 111™-Z will not disappoint.

7253Z [MSRP \$26.99]

7254Z [MSRP \$26.99]

7255Z [MSRP \$29.99]

7256Z [MSRP \$29.99]

Specifications

LAKE 111™-Z 2

7253Z: Razor-Sharp Cutting Edge
7254Z: Combo Serrated Cutting Edge
Blade: Length: 2.50" [64 mm]
Thickness: 0.090" [2.3 mm]
Steel: 8Cr14MoV, 58-59 HRC
Closed: Handle length: 3.50" [89 mm]
Open: Overall length: 6.00" [152 mm]
Weight: 2.1 oz. [60 g]

LAKE 111™-Z

7255Z: Razor-Sharp Cutting Edge
7256Z: Combo Serrated Cutting Edge
Blade: Length: 3.125" [79 mm]
Thickness: 0.110" [2.8 mm]
Steel: 8Cr14MoV, 58-59 HRC
Closed: Handle length: 4.125" [105 mm]
Open: Overall length: 7.25" [184 mm]
Weight: 3.1 oz. [88 g]

U.S. Patent No. 7,140,110

The low-profile handle and surface texture clean up easily and offer nice grip.

Model 7255Z

Classic blade style offers maximum utility for every day cutting tasks.

EDGE

Available in claspbacks as 7253ZC, 7254ZC, 7255ZC and 7256ZC.

Slide the L.B.S.™ button forward, and the blade is locked. It works both when the blade is open and closed.

Lake 111™ models feature a flat cross-section for easy in-pocket carry, and a unique Ron Lake style open build.

Handy denim carry sheath included with larger models.

M16[®]-Z

CARSON DESIGN

These Knives are Built for Function. Not Fad. And They Are Exceptional Performance Values!

Its origins are legendary in the knife world. Kit Carson's M16[®] designs have been filling pockets and fulfilling needs of many a knife user for nearly 15 years. That speaks volumes to its true testament to quality design and functional aptitude over a broad spectrum of cutting applications. And this, the M16[®]-Z has proven to be our most popular configuration to date. Founded upon our stainless steel Interframe, we overbuild it for rigidity with glass filled nylon back spacers spanning the tough, textured, glass filled nylon handle scales, and assembled with Torx[®] fasteners throughout. The handle design gives you the best of everything in profile, grip and ease of carry. The M16[®]-Z is available in several purpose minded blade configurations with each offering their own advantages. Their high-carbon stainless steel is non-glare finished and sharpened up to razor sharp edges. And for openers, all models feature the Carson Flipper, which also makes for a great blade guard in the open position. Factor in our patented* AutoLAWKS[™] automatic knife safety and you have yourself a virtual fixed blade when blades are locked open. So if you are the kind of individual who appreciates great design and solid performance, take this one out for a spin!

Specifications

M16[®]-02Z: Razor-Sharp Cutting Edge
M16[®]-12Z: Combined Razor-Sharp & Triple-Point Serrated Cutting Edge

Blade: Length: 3.125" [79 mm]
Thickness: 0.120" [3.0 mm]
Steel: AUS 4, 55-57 HRC

Closed: Handle length: 4.25" [108 mm]
Open: Overall length: 7.25" [184 mm]
Weight: 3.7 oz. [105 g]

M16[®]-Z EDC

CARSON DESIGN

Arguably One of the Best Knife Designs to Come Along, and One of the Best Values in the Work and Sport Knife World. Bar None!

Here's a cutting tool design that just makes good sense. Adapted directly from the very successful M16[®] platform, the M16[®]-Z EDC (Every Day Carry), was expressly developed with the value conscious user in mind. You still get the functional design that Kit Carson is known for, which in this knife is built upon a dual stainless steel liner InterFrame, and glass filled nylon back spacers. Textured glass filled nylon scales complete the formidable handle assembly with Torx[®] fasteners used throughout. Available in several configurations, blades are fashioned from high-carbon stainless steel for optimum toughness and edge holding ability, coming in either bead-blast or a black EDP finish. If you're needing to cut any fibrous materials such as rope, chord, webbing, nets or vegetation, checkout the Triple-Point[™] Serrated edges. And, with additional features like the Carson Flipper and patented* AutoLAWKS[™] knife safety, these models really step up your game—without breaking the bank.

Overall profile and body contouring make for a very strong, comfortable grip.

Carson Flipper works as a great finger guard in the open position.

Blade design is very functional and offers the utility needed.

Open: Overall length: 7.00" [178 mm]
Weight: 2.5 oz. [71 g]

*U.S. Patent Nos. 5,596,808 and 7,437,822

Available in clasp packs as M16-01ZC, M16-10ZC, M16-01KZC, and M16-10KZC.

As on larger M16[®]-Z models, you get the AutoLAWKS safety, dual thumb studs, Carson Flipper and removable clip.

Our rigid InterFrame build uses dual stainless steel liners, glass-filled nylon scales and back spacer.

EDC

M16[®]-SS EDC

CARSON DESIGN

It's A Proven Knife Design Platform Made Simple, Tough and Affordable.

If you are a fan of the Kit Carson designed M16[®] folder you are going to want to check out these stainless steel variations. Handles are shaped and contoured in the same confident M16[®] style grip, but are crafted of a retro flavored stainless steel. Handles are finished in a classic black oxide finish. These folders are available in several blade style options including cutting edge configurations, each with their own advantages. Blades also feature the Carson Flipper for quick and convenient blade actuation—and the flipper doubles as an effective blade guard in the open position. Blade lock up is secured through the traditional frame lock mechanism. The M16[®]-SS is a straight up, “no frills” folder design that kicks butt in pure performance and value.

M16[®]-10KSF: Black Tanto Blade, Frame and Hardware

Available in clompacts as
M16-01SC, M16-10SC,
M16-01KSC, M16-10KSC and M16-10KSFC.

Stainless steel pocket clip is movable and provides convenient carry/access.

Model M16-10KSF

Same great M16[®] blade styles, which have been field proven.

Model M16-01S

Model M16-10S

A robust, rigid handle/frame construction is tough, yet still overall compact for low impact carry.

The double flipper makes for an effective blade guard in its open position on the M16[®]-10KSF.

M21™

CARSON DESIGN

Yet Another in the High-Octane Line of Kit Carson Designed, Aluminum Handled Cutting Tools. This Model Features a Deep-Bellied Spear Point Blade That Comes Up Big On Utility.

Since its inception, this swaged and recurved spear point blade shape has been gaining in popularity in large part due to its cutting versatility. The grind incorporates a false top edge and deep belly, while retaining its full-thickness central spine over the majority of the blade length—giving it maximum strength without sacrificing blade balance. Blades are available in several edge configurations and employ the Carson Flipper blade extension for easy opening, as well as an additional blade guard. The M21™ open build uses charcoal gray anodized aluminum handles, which are radius contoured to allow your hand to “fit” their shape for secure grip. Skeletonized with holes to reduce weight, the handles are still plenty robust. Blade lock up comes in the form of a single stainless steel locking liner backed up with our patented* AutoLAWKS™. To sum it up, the M21™ is one lean, mean cutting machine!

EDGE

Model M21-02

A blade style that not only performs well—but looks good.

Design detailing like finger grooves/treads add more tool control.

M21-02 [MSRP \$89.99]

Weight: 5.5 oz. [156 g]

* U.S. Patent Nos. 5,596,808 and 7,437,822

Available in clasp as M21-14C.

The Carson Flipper aids opening and the AutoLAWKS safety turns the M21™ into a virtual fixed blade.

The deep-bellied blade is ground with a recurve and false edge to give maximum strength in a spear point.

M21™ G10

CARSON DESIGN

To Have and to Hold... If You Have Ever Owned a G10 Handled Knife Before, You Know Its Inherent Qualities. If Not, You Owe It to Yourself to Do So. And, Did We Mention It Comes in a True Left-Hand Model, Too!

Much like a custom knife maker does, we like to explore our options—and the M21™ G10 does just that. And, like many custom knifemakers, we chose G10 for its aggressive texture for uncompromising grip; its lightweight, rugged toughness; and interestingly enough, its insulator properties which make it cooler to grip in blazing sun heat, while at the same time warmer to grip in subfreezing temperatures. It's a lot to "handle". All M21™ G10 models have a swaged, recurved spear point blade made of premium stainless steel and coated with nonreflective black titanium nitride finish for maximum corrosion resistance. And for added cutting versatility, the patented² Veff™ Serrations are effective. Blade opening is easy with the Carson Flipper blade extension which doubles as an added blade guard in its open position. Blade lock up comes by way of a stainless steel locking liner, and the added security of our patented¹ AutoLAWKS™ automatic knife safety. So there you have the M21™ G10 series. We call it a "premium value line."

Everything you could ask for in a custom-quality work knife at a great price.

2. U.S. Patent No. D559,939

We now offer a true left-hand model, the M21™-02GL, with the AutoLAWKS safety, locking liner, and clip reversed.

The swaged, deep-bellied blade is available with our exclusive Veff Serrations for fast cutting of cord and vegetation.

[M21 G10]

G10 composite is one of the toughest, lightest and near indestructible handle scale materials.

The Carson flipper allows quick, easy blade access, and is an effective blade guard.

The M21™-02G is available in a true left-hand model.

Model M21-02G

M4™-02

CARSON DESIGN

From the First Time You Set Eyes On These Designs, You Are Entranced with Their Custom Look and Feel; From Bolstered Scales to High Polish Finishes—a True Testament to Carson’s Classic Custom Folders.

The M4™ series is based on one of custom maker Kit Carson’s most consistent designs going back to the early 90’s. He learned early, that “if it ain’t broke—don’t mess with it.” The CRKT® collaboration most closely models Kit’s smaller every day carry (EDC) size and includes the exotic material scales with contoured bolsters to add that extra level of complexity in the build. We are confident you will appreciate the attention to detail throughout. Our heavy-duty InterFrame build is true to Kit’s design, with dual stainless steel liners, one locking, and a stainless steel back spacer. The real “kicker” though, is in the high hollow-grind stainless steel drop point blade and its patented OutBurst® assisted opener. The blade springs open to a fully locked position once you have leveraged the ambidextrous thumb-stud beyond approximately 30 degrees. And, all stainless steel bolster models incorporate our patented* LAWKS® safety for added security. If you are looking to “customize” your EDC knife, the M4™ is well worth a look.

EDGE

Exotic handle materials help to set the M4™ apart from others.

Ambidextrous thumb-stud opener makes blade actuation simple.

Model M4-02W

Model M4-02S

Brushed stainless steel bolstered scales are a classic touch.

NIRK™ & NIRK™ NOVO

KLECKER DESIGN

If There Was Ever a Knife Perfectly Suited for Every Toolbox, It's This One. Its Simplistic Form and Function Will Never Let You Down and Help to Make It an Ideal Choice for When Less Complicated is More Beneficial.

Designer, Glenn Klecker calls it "Nathan's Irreducible complexity Knife", or NIRK™. Nathan is his son, and the irreducible complexity terminology defines the knife's unique single system engineering. In layman terms, it means the NIRK™ only has what it needs to do the job, and nothing it doesn't. The innovation is Glenn's use of a single sheet of stamped and formed stainless steel to serve as the folder frame, backspacer, spring and lock, resulting in a solid lock back folder. At the frame front end, the lock tab mates with a notch in the blade to provide safe lockup. And the tighter the grip on the handle, the tighter the "Klecker Lock" engages, for an exceptionally safe design. Currently, there are four models available. The NIRK™ is the larger of the two and features a deep belly, high hollow grind stainless steel drop point blade shape with oval thumb-hole opener. Slightly smaller, the NIRK™ NOVO employs a sheepsfoot blade shape with a thumb stud opener. This is definitely one knife design where what you see is what you get—including solid form and function.

This lock tab mates with the notch in the blade, resulting in a very strong and safe steel-on-steel lockup.

Press at the base of the spine to release the lock. A cam grind in the blade safely stops the blade at mid-point.

FREE RANGE® HUNTERS

KOMMER DESIGN

FISH

Fixed Blade or Folder, Both Are Great Designs And Great Values For Your Outdoor Adventures.

As a longtime Alaskan hunting and fishing guide, custom knifemaker Russ Kommer has pretty much seen it all over the years when it comes to outdoor knives. Outdoorsmen choose their particular knives based on a variety of reasons from function, feel, looks, and overall value consideration—which is exactly where the Free Range® Hunters come in. This series of fixed blades and lock back folding knives feature high hollow ground blades in clip and drop point blade styles. Drop point features a gut hook. Handles are comfortably shaped and the optimally sized finger grooves help to provide grip confidence equally well for both large, or small hands. A double injection mold process of both hard and soft polymers creates an ideal all-weather, textured handle surface. All knives come with their own high-strength nylon fabric belt sheaths for convenient, comfortable carry. If you are the type that enjoys adventuring outdoors, you owe it to yourself to have the right cutting tool to make life outdoors more enjoyable. The Free Range® Hunter series of knives is destined to be a part of many an outdoor adventure for years to come!

**“BUILT FOR THE GREAT
OUTDOORSMAN IN YOU—
GET OUTSIDE MORE.”**
FREE RANGE®

A multi-function, reinforced nylon fabric sheath design adds to the overall value of these great knives.

Model 2040

Injection molded handles are designed for confident, all-weather grip.

Free Range® Hunter folders are well suited for the person that likes to keep things smaller and compact.

Model 2043

2040 [MSRP \$49.99]

2041 [MSRP \$49.99]

2042 [MSRP \$49.99]

2043 [MSRP \$49.99]

A high hollow ground, clip-point blade style is a great choice for a variety of outdoor cutting tasks.

The choice of a gut hook provides hunters an easy and effective way to dress game animals.

Molded finger grooves add blade security and good grip especially with cold, wet hands.

HUNTING/FISH

Fitted leather sheath keeps the knife secure, and offers comfortable carry.

High-polish finishes make clean up easy, and offer a classic look.

Model 2850

The Model 2860 offers a more traditional styling both in knife and sheath.

2850 [MSRP \$150.00]

2860 [MSRP \$165.00]

KOMMER COLLECTION

KOMMER DESIGNS

They're Everything You Would Expect in a Knife Design from an Outdoorsman/Hunting Guide, and More Importantly—Nothing You Wouldn't.

When Russ Kommer is not out working hard and living the dream of being an Alaskan hunting guide, he is designing some of the finest hunting and outdoor knives around. The Bez Tine™ Skinner is a classic fixed blade skinner with a high-carbon stainless steel blade for edge durability and sharpness. Staying true to tradition, the blades are mirror polished for added corrosion resistance. Hand contoured walnut scales and steel bolsters are steel pinned to the full-tang blade handle assembly. A custom leather sheath completes the outfit. Our Brow Tine™ Hunter is a traditional drop point hunter right down to the stag handle with its mosaic mounting pins. A high-carbon stainless steel, full-tang blade with mirror polish finish, nicely balances the design for effortless blade control. For carry, a tooled leather sheath compliments the package nicely. Hunters, whether new or "seasoned," are sure to appreciate any and all of these great cutting tool designs.

Specifications

BEZ TINE™ SKINNER

2850: Classic Skinner
Blade: Length: 3.25" [83 mm]
Thickness: 0.160" [4.0 mm]
Steel: 1.4116, 55-57 HRC
Knife: Overall length: 7.375" [187 mm]
Weight: 6.8 oz. [193 g]
Sheath: Weight: 2.6 oz. [74 g]

BROW TINE™ HUNTER

2860: Classic Drop Point
Blade: Length: 3.0" [76 mm]
Thickness: 0.140" [3.5 mm]
Steel: 9Cr18MoV, 58-60 HRC
Knife: Overall length: 7.25" [184 mm]
Weight: 4.0 oz. [113 g]
Sheath: Weight: 1.3 oz. [37 g]

NOTE: Natural horn and wood components may vary in color and grain pattern.

Check out any of our accessory sharpeners to make in-the-field touch up of hunting knives quick and easy. [pages 53 and 61]

The Brow Tine features stag handles held by brass and stainless steel mosaic pins in the traditional manner.

KOMMER FAVORITES

KOMMER DESIGNS

Who Better to Design Outdoor Knives Than an Experienced Alaskan Fishing and Hunting Guide Who's Livelihood Depends On His Abilities In Everything Outdoors.

Here are several of custom knifemaker Russ Kommer's personal favorites when it comes to his outdoor knife designs. The Kommer 2-Shot® Skinner is available as a fixed blade, or as a nicely sized lock back folder. Both knives feature a mirror polished, "bellied" drop point blade with high-hollow grind for razor sharpness. Stainless steel bolsters and bright orange G10 handle scales fill the grip comfortably. The fixed blade design is also available in the Grandpa's Favorite® model, which features stainless steel bolsters and stag handle scales for a more traditional look. Each comes with a premium grade leather sheath for secure carry afield. The Surf N' Turf® folder is an ideal choice for fishing, hunting or around camp. The 5-inch long fillet blade shape does well for cleaning and filleting the day's catch, or makes for a great boning knife in a hunter's pack. And, around camp you can use it for a handy kitchen knife. It's slender, curved handle shape has contoured POM scales, which provide lasting durability. Now you can easily outfit your outdoor adventures in true sportsman style.

KOMMER 2-SHOT® FOLDER

2841: Razor-Sharp Cutting Edge, Orange G10 Scales
Blade: Length: 3.00" [76 mm]
Thickness: 0.11" [2.8 mm]
Steel: 12C27 Sandvik, 59-61 HRC
Closed: Handle length: 4.25" [108 mm]
Open: Overall length: 7.25" [184 mm]
Weight: 4.3 oz. [122 g]
Sheath: Leather, Belt-Carry Style with Snap Closure

KOMMER 2-SHOT® SKINNER

2840: Semi-skinner, Orange G10 Scales

GRANDPA'S FAVORITE®

2845: Semi-skinner, Stag Scales
Blade: Length: 3.15" [80 mm]
Thickness: 0.114" [2.9 mm]
Steel: 12C27 Sandvik, 59-61 HRC
Knife: Overall length: 7.30" [185 mm]
Weight: 3.8 oz. [108 g]

2-SHOT® & GRANDPA'S FAVORITE® SHEATH

Sheath: Overall length: 6.0" [152 mm]
Width: 3.0" [76 mm]
Weight: 4.9 oz. [139 g]
Material: Leather

Surf N' Turf® FOLDER

3080: Razor-Sharp Cutting Edge, POM Scales
Blade: Length: 5.00" [127 mm]
Thickness: 0.07" [1.8 mm]
Steel: 5Cr13MoV, 55-57 HRC
Closed: Handle length: 6.50" [165 mm]
Open: Overall length: 11.50" [292mm]
Weight: 5.5 oz. [156 g]

Nothing says hunting knife more than stainless steel bolsters and stag handles.

Model 2845

High polish blade finish makes clean up easy.

Deluxe leather sheath—even carries two extra ammunition cartridges just in case.

NOTE: Natural horn components may vary in color and grain pattern.

BIG EDDY™ & CRKT FILLETS

KOMMER DESIGN

Fillet Knives Are Like Fishing Lures...You Try Plenty Until You Find the One That Really Works and Then You Are Easily Hooked!

Custom knifemaker Russ Kommer's years as a successful hunting and fishing guide in Alaska enabled him to see and try his share of knives and he soon learned that sometimes you just have to do it yourself to get it right. With his Big Eddy™ knife he "broke the mold" on traditional fillet knife design. Most fillets rely on a symmetrical blade grind for cutting, but what Russ did was apply a hollow grind on the topside and a flat grind on the bottom. So as you are filleting, this ingeniously makes your fish fillets lift and "float" off of the topside while the bottom side is gliding and not "digging" into the skin. And for bones, fins and gristle the Triple-Point™ serrations do the trick. Handles are Twin-Fused™ for a rigid yet cushioned all-weather grip and comes with a lanyard for added hold. We also thought you might want fillet knife options at an even more affordable price point so we asked Russ to develop our CRKT® Fillets. These are great choices and come in 3 sizes made especially for those "big ones" that don't get away. The blades are stainless steel with an extended tang into the grip for added blade feel and control. For less cutting drag, we hand grind scallops into the blade face so fillets won't stick or bunch. CRKT® Fillet handles are molded TPR and shaped for confident, comfortable grip. You know you should really go fishing more! And might we suggest taking along one of these great fillet knives to properly take care of your catch. Fish on!

These scallops, hand ground on each blade, create air pockets so fillets don't stick to the blade when cutting.

The hollow grind on the top side of the blade "floats" fillets off; the flat grind side won't dig into fish skin.

All models include a molded sheath for safe carry and storage.

SHAKAULU™

ONION DESIGN

Here's the Big Game Hunter's Essential Utility Tool: Skinning Knife with Gut Hook and Hefty Cleaver in a Rugged Locking Convertible Sheath.

This unique cutting tool design is the combination of two ancient Alaskan and Canadian tribal tools: the ulu palm knife and scraper plus the cleaver. Ken Onion developed the versatile tool to help big game hunters like himself quickly and efficiently field dress their game animals. An effective gut hook cuts only as deep as needed without over penetrating. The fully curved skinning edge has a high convex grind for maximum strength and its carbon steel make up keeps your edge sharper longer, too. This edge design proves itself equally worthy in skinning, or in cleaving tough bones as needed for dressing or quartering an animal. And for corrosion resistance we black powder coat the surfaces. The ergonomic handle shape offers secure all-weather grip. It is Twin-Fused™— first with a hard black polypropylene handle form followed with softer dark green TPE inserts. Together, they combine for the much needed optimal grip in a versatile tool. The Shakaulu™ is not to be confused for a brush cutter or hatchet. Its purpose is to make the job of dressing big game animals much more efficient and simple.

For skinning, the thumb hole lets the hunter use a traditional ulu grip with great security and control.

The convertible sheath is designed for inverted carry, left or right hand, by removable belt clip or webbing slots.

ONION SKINNER™

ONION DESIGN

Not Your Typical Looking Hunting Skinner... But Then Ken Onion is Not Your Typical Custom Knife Designer.

Ken set out to design the ultimate hunting knife some years back by sending out dozens of designs to various Alaskan hunting guides for their first hand testing and feedback. And over the course of five years, they put evolving designs through the paces by cutting, skinning, dressing and deboning a variety of big game animals as well as the multitude of camp chore cutting tasks. From there, Ken took all of the expert feedback and test results straight back to the drawing board and developed the Onion Skinner.™ While some were skeptical at first, it has become the favorite knife of many of the top guides. It features a three-quarter tang Bohler K110 stainless steel blade, high hollow ground and polished to a satin finish with optimum edge toughness. The scales are Twin-Fused™ with a glass-filled nylon core and soft-textured TPR outside for all-weather grip. A deep finger choil in the handle helps for safer grip even when wet. The custom leather sheath is molded and fitted to grip the scales to lock the knife in. It can be worn inside or outside the belt on right or left side. So there you have it. The Onion Skinner™ has a lot going for it, including the “muster” passing approvals of many an Alaskan hunting guide. And they oughta know their knives.

K700KXP
[MSRP \$89.99]

as K480CXPC and K481CXPC.

Molded glass-filled nylon handle design is lightweight, durable and all-weather resistant.

To open instantly, just press the flipper. Lubrous washers and bronze bushings at the blade pivot give buttery smooth action.

ONION SURVIVAL PARA-SAW™

ONION DESIGN

Having a Length of Cordage Along on Your Great Outdoor Excursions is Never a Bad Idea... And, Cleverly Adding in a Handy Cable Saw for the Unexpected Couldn't Hurt Either.

Ken Onion applied his passion for creating useful tools, and his personal love of the outdoors in designing the Survival Para-Saw™. It is 8 to 9 foot length of nylon paracord that's braided into a bracelet form—with a plastic encased, tungsten carbide wire saw woven into the braided cord. In the event that you had to use the cordage and/or wire saw, you simply unravel the bracelet. The Para-Saw™ uses a quick release buckle to easily secure it on your wrist, or on your gear. Available in two sizes/lengths and several earthy colors. Now you can have along two very handy survival tools, in one easy to travel package! Cordage for securing, lashing, or paring down for other uses. And, an effective wire saw to cut limbs, wood, or any number of things in a survival situation. If you are the type that gets outdoors, these are a must have.

REDEMPTION™

ONION DESIGN

In Some Situations, Having a Large Fixed Blade Survival Knife Makes Great Sense—Especially One Like This.

The worst time to figure out that you brought along a bad knife is at a time when you need it most. The Ken Onion designed Redemption™ wields a hefty, "Onion style" drop-point blade shape with a generous recurve edge to maximize cutting efficiencies across its full length. Additionally, the robust three-quarter tang blade, and its flat grind do well in chopping or slashing tasks. Its G10 handle is purposefully contoured with swells, curves and grooves to fill your grip, for a solid, secure hold no matter the task. In spite of its size, the Redemption™ offers a well balanced, controllable feel, which is important when you are off the grid. The sheath is constructed of a high-strength nylon with a reversible formed thermal plastic insert to make carry safe and comfortable. The leg strap is ideal for secure fit. So, if your world has the potential for big problems, redeem yourself with a knife built to take it.

Large finger guard enhances safety and overall blade control. G10 handle is shaped to fill your grip comfortably for hard use.

Three-quarter tang blade is plenty thick for overall cutting tool integrity and toughness.

STING™

RUSSELL DESIGN

When Size Matters, It's Nice to Have Options. And, If You Can Go Small On Size with Big Utility? Even Better!

The CRKT® production Sting™, designed by renowned knife guru A.G. Russell, is a great reflection of his appreciation for pure form. Its compact size makes the most of every performance detail from the hot forged carbon steel spear-point blade to the symmetrical balanced and nicely contoured integral handle. It's nothing extravagant—because it does not have to be.

Sheath design affords easy and comfortable leg carry with two loop fastener carry straps to cinch it in place.

The molded handle form is low-profile, yet provides confident grip.

Model 2020

2020 [MSRP \$69.99]

Specifications

A.G.R. STING™

2020: Razor-Sharp Cutting Edges
Blade: Length: 3.197" [81 mm]
Thickness: 0.137" [3.5 mm]
Steel: 1050, 52-55 HRC
Knife: Overall length: 6.85" [174 mm]
Weight: 3.9 oz. [110 g]

STING™ SHEATH

Material: High-Strength Nylon Fabric /
Glass Filled Nylon Insert
Length: 6.50" [165 mm]
Width: 2.125" [54 mm]
Weight: 1.2 oz. [34 g] without straps
2.4 oz. [68 g] with straps

A spear-point blade does well for piercing tasks and offers a dual cutting edge for slicing.

The Sting™ thumb detents lock the knife into the sheath and allow a secure grip, even with gloves on.

SURVIVAL

BEAR CLAW™

KOMMER DESIGN

A Clever Design Whose Cutting Prowess Comes From Intuitive Control Under Duress and the Absolute Need For Speed in Life or Death Situations.

Sounds serious because it is. Russ Kommer's original intent for his custom Bear Claw™ knife was for an effective self defense tool for women who found themselves being threatened. However, it wasn't long before others began discovering the same performance traits were beneficial to their own respective "tough situations". Bush pilots, commercial fishermen, rescue personnel and even parachutists are among those who have a genuine need for fast access and dispatch of potentially life threatening ropes, cords, safety belts, fishing gear as well as any other fibrous materials. The CRKT® Bear Claw™ is available in three blade styles, each with their own purpose driven cutting edges. Blades are full-tang, taper-ground stainless steel with a bead blast finish. Finger grooves/treads are located in the grip area of the blade tang around the top and bottom of the oversized, round finger hole. The contour molded glass filled nylon handle is swelled to fill the grip, and its accentuated finger choil adds safety as well. For versatile carry, the molded sheath offers plenty of options all the while still stowing the knife reliably. And access is as fast as a quick pull or, as subtle as a thumb push to draw. Stuff happens! But if you have the proper tools at the ready, you are more likely to avoid worst-case scenarios.

KEYDASHI™ & RSK Mk5™

IKOMA & RITTER DESIGNS

Two Simple, Fixed Blade Knife Designs, Each with Their Own Purpose Minded Simplicity.

Getting back to basics, Flavio Ikoma obviously feels that a sharp blade, functional handle and a means to stow and carry a cutting tool are all one really needs. The **Keydashi™** skeletonized full-tang, curved blade is hollow ground on one side, and provides plenty of utility beyond being an ideal skinner blade. With its handle position relative to the blade, you can readily slice, cut, mince, shave and skin. And, the handle uses molded glass filled nylon scales, which are treaded and shaped to provide grip along with a braided nylon fob for extra hold. An ingenious sheath design makes carry nearly unlimited with the ability to stow, tether or even put on a key ring if desired. The Keydashi may not be for everyone, but for those willing to give it a try, it may just surprise.

The **RSK Mk5™** [Ritter Survival Knife] is the collaborative brainchild of Equipped To Survive™ founder Doug Ritter, based on a custom knife from David White. This knife is not intended for every day use, but rather in survival situations. Doug's philosophy is, "if it isn't with you, it can't save you™". At less than an ounce, this high-carbon stainless, wide-chord drop-point blade is useful in wilderness or urban survival situations. The Mk5™ comes with its own nylon cord fob, fitted glass filled nylon sheath and even a mint-sized carrying tin along with Doug's suggestions for compiling your own personal survival kit.

To release the single-sided sheath plate, simply push down on its top with your thumb to release the locking detent.

The RSK Mk5™ has a skeletonized perimeter frame with a nylon lanyard to add extra security and grip.

Injection molded handle is durable and easy to clean.

Model 5006

Model 5005

Special blade pivot design allows you to readily disassemble the tool for knife use.

Tool disassembles easily, creating an effective knife for a multitude of cutting tasks.

CROSSOVER®

CRKT® DESIGN

Just Maybe The World's Best Camp Knife, Shears/Scissors Combo...It's Ideal for the RV, Cabin, Galley, Hunting Camp, or Even the Home Kitchen.

It's tough to beat the value of a quality pair of shears/scissors when that's the right tool for the job, especially the Crossover® with its many talents. Beyond premium quality shears, it's a kitchen knife, bottle opener, lid lifter/screwdriver and grill cleaner. Just think of the many uses you could find for this handy cutting tool. The Crossover® is built with a full-tang high-carbon stainless steel frame underlying the knife/scissors, and with ergonomic injection molded glass filled nylon handles. The scissors' finger loop is made of flexible TPR with a stainless steel strap core for long life. It's an obvious choice once you consider your options.

Twist at the pivot, press the handle guard in, and you have a stainless steel kitchen knife ready to slice and dice.

The flexible finger loop is steel reinforced. Pull it out for scissors use, press it in the handle slot for knife use.

KOMMER P.T.S.TM & VEFF SHARPTM

KOMMER & VEFF DESIGNS

Two Patented Sharpening Systems Designed to Keep Every One of Your Knives Sharp—including Serrations, Gut Hooks, Razor Edges and Even Chisels and Router Bits.

There's no excuse for a dull cutting tool, especially with the Tom Veff designed **Veff SharpTM** on hand. The system includes an anodized knurled aluminum handle and two threaded 600-grit diamond-coated sharpening rods. The smaller rod has three 2" straight sections in sizes $\frac{3}{32}$ ", $\frac{3}{16}$ " and $\frac{1}{4}$ ". The larger rod has three straight sections in sizes $\frac{11}{32}$ ", $\frac{1}{2}$ " and $\frac{5}{8}$ ". The larger rod also has a 6" flat side. This system is effective on most serrations including the patented¹ VeffTM Serrations. Includes a handy nylon storage pouch.

Russ Kommer designed our **P.T.S.TM** [Pelvic Tool/Sharpener] for splitting the big game pelvic bones when dressing your kills. Its stainless steel make up and chisel edge easily do the job like a wood splitting wedge. Additionally, we coated the P.T.S.TM with a No. 400 diamond grit for handy field sharpening. The backside has two grooves to sharpen fish hooks and arrow broadheads; the tapered, rounded edges are great to sharpen serrations. A braided leather thong is included for handier grip along with a compact nylon sheath for carry.

**Model 2851
P.T.S.TM**

The P.T.S.TM is a natural addition to any hunter's gear pack.

2851 [MSRP \$39.99]

VEFF1 [MSRP \$49.99]

Specifications

P.T.S.TM PELVIC TOOL/SHARPENER

2851: Length: 4.5" [114 mm]
Thickness: 0.140" [3.5 mm]
Steel: 3Cr13, 52-55 HRC
Weight: 3.8 oz. [108 g]

VEFF SHARPTM

VEFF1: System with storage case
Grit: 600 Diamond
Handle: Length: 2.625" [67 mm]
Rod 1: Length: 6.38" [162 mm]
Weight: 2.9 oz. [82 g]
Rod 2: Length: 5.88" [149 mm]
Weight: 2.0 oz. [57 g]

1. U.S. Patent No. D599,939

A nice combination of shapes and sizes to sharpen just about anything you have.

Packs neatly into a nylon pouch.

**Model VEFF1
Veff SharpTM**

The six stepped-cylindrical sections of the Veff Sharp rods give you the right size for almost any serration.

The P.T.S.TM is a great tool to have in your hunting pack for putting an edge back on quickly. And, the pelvic tool is also handy.

OUTDOOR ESSENTIALS

GUPPIE® & LI'L GUPPIE®

BARBER DESIGN

They May Look Small, But When You Find Yourself Needing a Tool Most— They Come Up Big Every Time!

It's a handful of tools engineered into a "go package" so you can have it along with you wherever life takes you. Sure, it's not going to replace your toolbox, but it still does plenty and it is a whole lot easier to carry in your pocket, pack or vehicle. The Guppie® packs the tool utility of an adjustable wrench, knife, screwdriver with multiple bits, bottle opener, carry carabiner, and removable bit carrier with L.E.D. light. And its smaller image, the Li'l Guppie®, tools up with an adjustable wrench, knife, flat and Phillips screwdriver, bottle opener, and carry carabiner. Guppies are for those unexpected times when having a knife, a screwdriver or a small wrench can make all of the difference between a ruined outing—and getting back up and moving.

Specifications

GUPPIE®

9070: Bead-Blast and Black
9070K: Black on Black
 Blade Length: 2.0" [51 mm]

Zilla-Tool® & Zilla-Tool® JR

STOKES DESIGN

Stands Strong On Its Own Merits Or Makes an Ideal Compliment To The Guppie® Family.

It's been said that you can never have enough tools—and who are we to argue. The Zilla-Tool® & Zilla-Tool® JR are a streamlined pouch full of “Mr. or Mrs. Fix It.” Designed and engineered for compact, lightweight carry so they won't slow you down, the Zillas pack a handy-to-have mix of tools. Both models offer pliers, knife, wire cutter and stripper, flat and Phillips screwdrivers, bottle opener, carry-clip and sheath. Just select the size that best fits your needs, strap it on your belt, put it in your vehicle, or tuck it away in your gear bag until the inevitable repair, adjustment or assembly needs to get done. But be warned—if you loan it out, you may not get it back!

Specifications

ZILLA-TOOL®

9060: Bead-Blast and Black
 9060K: Black on Black
 Blade Length: 3.0" [76 mm]
 Blade Steel: 3Cr13, 52-55 HRC

 Length, blade open: 7.50" [190 mm]
 Tool Weight: 3.8 oz. [108 g]
 Black nylon sheath included.

U.S. Pat. No. D557,100.
 Magnets may harm electronic media.

Available in clasp packs as 9060C, 9060KC, 9065C and 9065KC.

2008 Top Award, Multitools

My pliers jaws are spring loaded, with a slight needle nose taper. They have both fine flat and circular toothed gripping surfaces.

To open my knife blade quickly, just press this little “flipper.” It also acts as a blade guard when it's open.

I'm designed with a comfortable ergonomic handle so I can help you get a lot of real work done.

Near the base of the pliers, I have a very useful wire cutter, and also a notch near the handle for wire stripping.

CRKT® TOOL

VAN HOY & STOKES DESIGNS

*If a Tool Is Only As Good As Its Usefulness,
Then This is Definitely a Must Have.*

Custom knifemakers Ed Van Hoy and Tom Stokes plied their talents for mechanical wizardry and efficiencies for fit in the CRKT® Tool. The compact body shape offers grip, and carries nicely. Tools include: utility blade, saw-tooth blade, multi-fit box wrench, wire stripper, button/spring opening Phillips/regular screwdrivers with additional driver bits, and bottle opener.

9200 [MSRP \$54.99]

Specifications

CRKT® TOOL

9200:

CRKT Tool

Bit driver adapter (magnetic) attaches to the Phillips head screwdriver arm.

MULTI-TOOL

EAT'N TOOL®

MAH DESIGN

**Just Because You Are Out in the "Untamed" Wilderness
Roughing It Does Not Mean That You Have to Give Up
Having a Great Eat'N Tool®.**

If you are like us, you soon realized that packing, or having convenient access to your eating utensils when you're in the outdoors, usually meant you just had to make do without more often than not. Well, not anymore! This handy device very simply and very effectively puts food in your mouth. The Eat'N Tool® is a spoon, fork, bottle opener, screwdriver/pry tip, metric wrench, and even comes with a carry carabiner. So, next time you head outdoors backpacking, camping or anywhere that eating might come up, have an Eat'N Tool® at the ready.

Comes with carabiner clip for easy to find carry and access.

Overall compact size is easy to pack along anywhere just in case.

Model 9100TC

Carabiner is non-weight-bearing.

Model 9110KC

The fork prongs are incorporated into the spoon front.

Comes with a carabiner for easy and convenient carry.

Multiple sized box wrench cut into handle.

The GI style can opener is nice to have around camp.

It functions very well as a spoon or fork to prepare and eat food with.

Model 9110C

EAT'N TOOL® XL

MAH DESIGN

**Sometimes Bigger Really Is Better.
The Same Great Tool—Now Goes BIG!**

If you are a current fan of the original Eat'N Tool®, you may have been one of the many who were wishing for a slightly bigger version. And, here it is! The Eat'N Tool® XL offers a larger spoon, and longer handle surface to grab hold of. Use it as a spoon, or fork to prepare and/or eat your favorite "on the trail" meal. Other handy tools include a box wrench, driver/pry tool, can opener and bottle opener. And, it comes with a carabiner to make carry simple and accessible. For the trail, camper or cabin, the Eat'N Tool® XL makes eating easy, and maybe even just a little bit fun.

The spoon and fork are easy to use with the extended handle size.

Open your favorite sodas, microbrews, and food in glass containers with the built-in bottle opener.

Use the GI style can opener to open your favorite canned item.

A straight blade screwdriver edge is handy when you need it, and can also be used as a pry tool.

Seatbelt cutter is shrouded for added cutting safety.

The snap-secure makes attachment to your seatbelt quick and easy.

Model 9030

Bright L.E.D. comes in handy for many uses.

Tungsten carbide window breaker makes quick work of today's modern automobile glass (side/rear windows).

Weight: 1.6 oz. [45 g]
Battery: 3V CR2032 Lithium
 U.S. Patent No. D642,444

EXITOOL®

KOMMER DESIGN

Anyone Who Has Ever Been Trapped in a Vehicle as a Result of a Horrific Accident Can Attest to the Importance of Being Prepared "When Seconds Matter®".

Accidents happen, that is a reality. So, anything you can do to improve your odds should you ever find yourself trapped in a vehicle only makes sense. Which is where the Russ Kommer designed ExiTool® comes in, and the best part is, it can be neatly clipped to your safety belt the whole time until you need it. The patented ExiTool® quickly detaches from your safety belt and includes a razor sharp belt/webbing cutter, tungsten carbide glass breaker, and bright L.E.D. flashlight with replaceable battery. All essential tools to help you or a loved one get out of a accident compromised vehicle. Seems like the right tool for every vehicle to have at the ready.

The ExiTool® clips over any standard car or truck seat belt and is styled to be completely unobtrusive. In an emergency, just grab the ExiTool® and you have a seat belt cutter, a window breaker and a bright L.E.D. emergency light.

GET-A-WAY® DRIVER, K.E.R.T.™ & CRKT® Micro Tool & SHARPENER

STOKES & KIRK DESIGNS

Three Pocket Sized Tools Designed to Make Your Life Easier and Maybe Prevent a Headache or Two.

We have all been there at one time or another...you're out somewhere and need a screwdriver to adjust, or tighten, or loosen, or assemble something—but unfortunately you did not have one with you. Well, the Tom Stokes' **Get-A-Way® Driver** with its convenient design and affordable value can go a long way in making sure you are never "screwed" again! A mix of bits depending on model, two-position bit driver, L.E.D. flashlight, bottle opener/pry bar, and oxygen bottle wrench are streamlined into a compact tool with its own carry carabiner.

Designer Ray Kirk has put his spin on the concept of a strap cutter with his **K.E.R.T.™** [Key ring Emergency Rescue Tool]. Now you can have a razor sharp seatbelt, webbing, or fibrous material cutter always at the ready hanging on your key ring. It also features a screwdriver, oxygen tank opener, bottle opener and 1/4" hex wrench. Put one in your pocket today!

Anyone who uses a knife regularly knows that having a sharp blade edge is much safer than trying to make a dull blade do the job. Designer Tom Stokes created this compact **CRKT® Micro Tool & Sharpener** so it would be easy to have along, and keep you sharp. You simply hold it firmly on a hard surface, place the rear of the blade edge into the "V" of the carbide sharpener blades and draw the knife through, pulling towards you. This handy tool also features a flathead screwdriver, small channel blade/cutter, and bottle opener. Comes with a split-ring for easy carry.

Model INOX4SX

360° model case lid features upturned lip for ease of access.

Lid hinges on the 360° model are designed to provide smooth, fully open rotation.

The iNoxCases feature a stainless steel exoskeleton, which encases your phone for protection.

Flip lids work great to prop your iNoxCases up to make a personal movie viewer on a table or desk.

The iNoxCases 360° lid flips/rotates fully open for complete screen access. Lid opens to horizontal on the 180° iNoxCases.

iNOXCASE® & iNOXCASE® 360

GLASGOW DESIGN

Protect Your iPhone 4/4S with the Stainless Steel iNoxCases and iNoxCases 360. It's the Ultra-Thin and Functionally Stylish Cell Phone Accessory—Your Extra Insurance for Flops and Drops.

The iNoxCases® features a 304 stainless steel exoskeleton. 304 stainless is the same stain and corrosion resistant steel, which shields the Gateway Arch in St. Louis, Missouri from the elements of nature and time.

The iNoxCases® features a 180-degree rotating visor lid, and the iNoxCases® 360° lid features full rotation. Both lid styles protect the front display and allow views of the time and incoming calls with the precision cut opening. Simply flip the visor lid to access the phone's buttons and apps.

With steel covering the iPhone® 4/4S aluminosilicate display, you can toss your phone in your travel bag without worrying about breaking the glass. Keys and coins won't scratch the display when you put it in your pocket either. Glasgow's stylish open build design allows access to all the ports and buttons on the iPhone® 4/4S with the lid open or closed. These cases feature an ultra-thin profile that adds minimal thickness or weight to the phone. This symphony of modern industrial wizardry finds its crescendo in the form of black posts that provide strength and good grip to tie it all neatly together making either of these must-have cell phone accessories.

The iNoxCases® is unlike any other cell phone case on the market—rugged yet stylish. Buy one today and protect your investment!

The iNoxCases 360° is available in 3 color models: **A. INOX4SX** all stainless steel/silver, **B. INOX4RX** silver body with red lid and the **C. INOX4WX** silver body with white lid. The iNoxCases 360° also features a removable rubber foot for the lid (shown above).

[iNoxCases®]

The elastic band on the iNoxCase's flip lid, easily accommodates credit/debit cards, cash, or ID cards.

The iNoxCase easily provides maximum clearance for input devices and chargers.

You can talk on the phone with the flip lid in the closed position on either iNoxCase. It is truly unique!

INOX4K [Black]

INOX4R [Rainbow]

INOX4S [Silver]

INOX4C [Realtree AP HD® Camo]

INOX4G [Gold]

The iNoxCase is available in 5 different color models.

“THERE'S NO FAILURE TO COMMUNICATE HERE... PROTECT YOUR PHONE.” INOXCASE®

Lid hinges are sturdy and made to hold up well and take the incidental bumps and bangs.

Model INOX4S

Flip lid opens with simple thumb rotation.

iPhone is a trademark of Apple, Inc. registered in the U.S. and other countries.

Black posts tie it all together for secure assembly and add overall grip.

PERSONAL SAFETY

WILLIAMS DESIGNS

LIGHTS, PEN & HEIHO™ FOLDER

WILLIAMS DESIGNS

Having the Right Tools When You Need Them, Along with the Proper Training—is a Matter of Your Own Personal Safety.

Unfortunately, much too often in today's changing world people fall victim by failing to properly prepare and protect themselves. But, with the right tools and some basic training, you can greatly improve your chances of thwarting an undesirable situation. World renowned "high level" self-defense trainer, martial artist and knife designer James Williams has developed his Personal Safety series for the average person, man or woman, so that they can actively protect themselves. Each of these tools already has an everyday function, so it makes it easier to have them on your person when you are out. Williams designed the lights to be compact, easy to carry, and possess the beam power to be effective in lighting the way, or in temporarily blinding an attacker. Just to use a light at night can signal that you are actively prepared. And, the tactical pen is a less lethal tool to strike an attacker, causing pain and resistance; while at the same time you can use it in your everyday world. The Heiho™ folding knife is efficiently designed to provide optimal shape and size for normal carry. The handle is easy to grip, and the blade opens quickly with the patented OutBurst® opening assist, along with a patented¹ LAWKS® safety. Usable for everyday tasks as well as being a go-to self-defense tool if warranted. So, do your homework and take control of your own personal safety by getting the right tools along with the proper training. Today.

Specifications

PERSONAL DEFENSE LIGHT

F1000: Black anodized finish; [1] Alkaline AA battery; Removable, wire carry-clip
Size: Overall length: 4.26" [108 mm]
Diameter: 0.96" [25 mm]
Weight: 2.9 oz. [82 g] including battery
Details: LED; changes modes—high mode [100 lumens; strobe] low mode [5 lumens; 10 lumens; 50 lumens; SOS]

TACTICAL APPLICATIONS LIGHT

F1010: Black anodized finish; [2] CR123A batteries; Removable, wire carry-clip
Size: Overall length: 4.84" [123 mm]
Diameter: 0.96" [25 mm]
Weight: 3.1 oz. [88 g] including batteries
Details: LED; changes modes—high mode [320 lumens; strobe] low mode [5 lumens; 10 lumens; 75 lumens; SOS]

TACTICAL PEN [Aluminum]

TPENWK: Nonreflective Black
Pen: Overall length: 6.00" [152 mm]
Diameter: 0.63" [16 mm]
Weight: 1.2 oz. [34 g]
Refill: Fisher® Space Pen #PR4

HEIHO™ FOLDER

2900: Razor-Sharp Cutting Edge, OutBurst® assisted opening, LAWKS® Safety
2901: Razor-Sharp Cutting Edge & Veff Serrations, OutBurst® assisted opening, LAWKS® Safety
Blade: Length: 3.125" [79 mm]
Thickness: 0.122" [3.1 mm]
Steel: 8Cr14MoV, 58-59 HRC
Handle length: 4.0" [102 mm]
Closed: Overall length: 7.00" [178 mm]
Open: Overall length: 7.00" [178 mm]
Weight: 3.6 oz. [102 g]

1. U.S. Patent No. 5,596,808

**Model F1000
Personal Defense Light**

Bezel slide-click adjusts forward and backward to narrow or widen projected light beam.

Removable, steel wire carry-clip helps to keep the flashlights right where you put them—at the ready.

**Model F1010
Tactical Applications Light**

Hard-coat anodized aluminum bodies are tough and strong for lasting durability.

G10 handle scales provide solid grip surface for confident use dexterity.

Lens reflectors provide maximum output and brightness of light.

Blade shape is purposefully profiled for piercing and penetration.

**Model TPENWK
Tactical Pen**

Tapered pen barrel design and grooved surface provides better gripping power.

Conical shaped handle end of pen barrel directs physical energy transfer to target.

WILLIAMS PEN comes with an olive drab color nylon fabric, zippered case with foam insert.

**Model 2900
Heiho™ Folder**

Designer James Williams has been teaching, training, and forever learning the skills that can help protect one's self. Developing the techniques and designing these tools is his life's passion.

Powerful LED output ideal for outdoor, self-defense or everyday-carry applications.

Two-position bezel pull clicks forward to narrow beam, and push clicks back for normal beam width.

Rubberized, tailcap button is pushed to control the multiple light modes as well as on/off.

Tactical pen cap is complete with steel clip for easy, everyday personal carry and access when you need it.

Pen barrel has ring grooves on either end for improved grip whether simply writing or, for self defense use.

Veff™ Serrations on the Heiho™ folder make cutting rope, webbing or fibrous materials quick and efficient.

F1010 [MSRP \$125.00]

TPENWK [MSRP \$69.99]

2900 [MSRP \$69.99]

2901 [MSRP \$69.99]

OTANASHI NOH KEN™ & HISSATSU™

WILLIAMS DESIGN

The Ultimate Close-Quarter Tactical Knives for Professional Law Enforcement and Military Use.

As a former Army officer and current martial arts practitioner/instructor, James Williams knows cutlery—especially the tactical variety. So, it's no surprise that his **Hissatsu™** designs have quickly become mainstays within the tactical law enforcement and special forces communities around the globe. Whether folder or fixed blade, these are focused single-purpose knives for use in anti-terrorist/close quarters battle (CQB) environments, either as a primary or a secondary weapon to augment the handgun in the hands of well-trained professionals. The fixed blade is available in several finishes, and as a desirable bonus, an aluminum bladed designated trainer model is available as well.

The **Otanashi noh Ken™** was designed per a request from SOCOM for a larger, thinner combat folder that was easier to carry and conceal. The Osoraku style blade, made famous by the 16th century Samurai warlord Takeda Shingen, is enormously efficient and effective. This knife has a longer blade than the Hissatsu™ folder and yet is slimmer to carry than the Heiho™. The clip allows deep carry and the frame lock strength and simplicity in operation. James Williams' work with military Special Operations and his classical Samurai training means that this knife will work when you need it most.

Twin-Fused™ molded handles are textured with a ray skin pattern for functional grip surface.

Sheaths are molded glass filled nylon and incorporate a variety of effective carry methods.

Blade are shaped and formed for optimum cutting qualities.

Available in clompacts as 2907KC and 2907DC.

HISSHOU[®], SHINBU[™] & SAKIMORI[™]

WILLIAMS DESIGNS

Hisshou Means "Certain Victory." Shinbu Means "Divine Valor." And, Sakimori Means "Noble Defender." These Are the Modern Embodiment of the Close-Quarters Sword of the Samurai.

James Williams developed these designs to meet the user specific requests of coalition forces overseas for a more powerful tactical tool. These knives come into play when the operator's firearms cannot be used, as often happens in entry and search operations. They are designed for multiple carry options to suit the operator. Each knife has its own advantages of size with their full-tang dual grind, high-carbon steel Tanto blades in high satin finish. And, James followed centuries of Japanese tradition in designing these classic cord-wrapped handles with ray skin underlays, which compares well to more modern handle materials, giving excellent grip under all conditions. Sheaths are custom-fitted molded PVC with their own convertible belt-mounting system. Grip detents and flared entry lips allow the knives to be resheathed securely with one hand. A belt clip can be attached, and there is also a quick-release retaining strap. The Hisshou[®], Shinbu[™] and Sakimori[™] knives command great respect, and are truly meant for today's military professional.

2910 [MSRP \$375.00]

2915 [MSRP \$350.00]

ULTIMA™ & F.T.W.S.®

MARTINEZ & ELISHEWITZ DESIGNS

WARNING: These Knives Were Designed and Built for Those Individuals Who Are Serious About What They Do.

Designer/inventor Michael Martinez used his talents to develop the **Ultima™**. It's a knife anchored with a very unique, patented¹ handle design. Injection-molded reinforced nylon is functionally groove textured to channel away liquids and debris while achieving 22 out of 23 ideal grip contact points. And the Ultima's stainless steel full-tang blade with titanium nitride coating features our patented² Veff™ Serrations for enhanced cutting abilities of rope, webbing, or leather.

Knife designer Allen Elishewitz is a former Recon Marine and a serious martial artist who used his specialized experience and background for this **F.T.W.S.®** (For Those Who Serve®) tactical cutting tool design. Allen purposefully considered every facet starting with the strength hardened carbon steel, powder coated blade with its modified spear point shape, broadened tip for penetration, and spine which is flat ground for hacking or chopping tasks. Sure-handed hold is had with a semi-hilt handle, plus four finger choils and a parrot beak end for maximum security. The injection-molded reinforced nylon handle scales are gripped through an aggressive pyramid texture.

Both knives are complimented with a custom like black high-strength, multi-purpose nylon sheath with injection-molded liner. Each is fully adjustable for versatile carry and Molle gear compatibility.

The F.T.W.S.® handle is designed for grip, with a semi-hilt, four finger choils, parrot beak, and textured scales.

On the Ultima™, these triangular blocks are separated by "ooze grooves" that allow water and mud to channel away from the grip.

CHOGAN™ & KANGEE™ T-HAWKS

JOHNSON DESIGNS

Useful Tools of the Professional Trade. To Have One is to Know and Appreciate Its True Worth in the Field—Especially, Ones This Good.

Tomahawks have been a mainstay of utility in the military for a long time. From manual utility tasks to self-defense fighting tools, they have carved out a place in many a tactical gear bag. Designer Ryan Johnson has been honing his tomahawk designs over the last 30 years and has built quite a loyal fan base among special forces troops. His Chogan™ and Kangee™ T-Hawks are shaped of single-piece steel with a curved handle and grip choils along the front for enhanced holding power. Full-length handle scales are checkered for added grip security, and can be removed for cleaning. The two different models offer bladed head styles, which provide good utility and toughness. Molle equipped, form-fitting Kydex sheaths slip over the head and secure with a buckled strap. You will find these T-Hawks very well balanced and easily controlled, while still being robust enough to handle most anything dished out.

2720
[MSRP \$185.00]

2725
[MSRP \$185.00]

Specifications

CHOGAN™ T-HAWK

2720: Axe Edge Front with Hammer;
Black Powder Coat
Blade: Length: 2.93" [75 mm]
Thickness: 0.24" [6.2 mm]
Steel: SK5 Carbon Steel, 54-55 HRC
Handle: Glass Filled Nylon; EDM Finish
Overall: Length: 14.00" [355 mm]
Weight: 1 lb. 8.6 oz. [697 g]
SHEATH: See below

KANGEE™ T-HAWK

2725: Axe Edge Front with Spike;
Black Powder Coat
Blade: Length: 2.93" [75 mm]
Thickness: 0.23" [5.8 mm]
Steel: SK5 Carbon Steel, 54-55 HRC
Handle: Glass Filled Nylon; EDM Finish
Overall: Length: 13.75" [349 mm]
Weight: 1 lb. 8.4 oz. [692 g]
SHEATH: Carry: Molle Clip Platform
Material: Black Kydex
Width: 7.31" [186 mm]
Weight: 3.6 oz. [102 g]

Cutting edges are tapered for efficient cutting utility and overall toughness.

The handle butt is exposed and could be used for prying. The holes allow for a lanyard, or lashing.

Model 2725
Kangee™

Model 2720
Chogan™

Edge geometry provides the proper "wedge" effect for splitting, chopping, or shaving.

Sheath is lightweight and provides for easy carry.

Hand texture is ideal for all-weather grip.

FE7™, FE9™ & TRAINER

HAMMOND DESIGNS

Operators Are a Select Breed of Soldier. They Demand the Most of Themselves—And of the Tools They Choose to Carry.

Whether you're being deployed to a foreign land, or you are just wanting a professional level tool stateside, the FE7™, FE9™ and FE9™ Trainer fixed blades are a force to be reckoned with. Custom knifemaker Jim Hammond designed, with Arcenio James Advincula's concepts, a knife series with "no bull" attitude. Having the right tool for the job, and the bonus of a trainer to help hone your skills is mission critical. An "aggressive" drop-point blade shape features a razor-sharp, slight recurve bottom edge along with a sharpened leading top edge. Combine those with the false edge upper, hollow ground profile, very robust 0.25-inch thick full-tang—and it lights out toughness. The handle is purposefully shaped of black G10, complete with pronounced finger grooves and full blade guard. Grip position is slightly angled in relation to the blade for maximum energy transfer when in use.

And for the ultimate in versatile field carry, the **sheath** goes well beyond the extra mile to ensure you limitless carry options without your having to make your own mods. Molded black nylon with glass fiber reinforcement halves are assembled to create a form fit "click in" cavity to contain the beast. A snap strap further secures the knife safely, even inverted.

The sheath has been designed to accommodate Molle clip attachments as well as having a leg strap and ample slots/grommets for lashing if warranted. It comes complete with all of the required hardware for belt or Molle attachment in both high or low positions.

To get the full benefit of these edged "tools", you are going to want to take advantage of working with the **FE9 Trainer**. It is modeled after the FE9™ in profile and size. The thermo plastic rubber (TPR) FE9™ likeness allows you to go through full physical motions and body maneuvers safely, while still gaining the proper skill level and dexterity wielding a knife like this can require.

Bottom line, the FE7™, FE9™ and FE9™ Trainer *are* the real deal designed and built for your world—wherever that may be today.

2208 [MSRP \$350.00]

2210 [MSRP \$375.00]

2210T [MSRP \$14.99]

Specifications

FE7™

2208: Black Powder Coated Blade, Razor-Sharp Cutting Edge
Blade: Length: 7.38" [187 mm]
Thickness: 0.24" [6 mm]
Steel: O1 Tool Steel, 56-58 HRC
Knife: Overall length: 12.5" [318 mm]
Weight: 13.3 oz. [377 g]

FE9™**

TACTICAL

SHEATH

FE9™ Sheath [front]

Sheath comes complete with a variety of fittings and hardware to adapt to your carry needs.

FE9™ Sheath [back]

Mounting accessories are specially designed to easily adapt to your needs, and to fit either sheath side for right or left draw carry; handle up or inverted.

FORESIGHT™

ONION DESIGN

Grab Hold of a Handful of Pure Cutting Tool Muscle.

As you pick up the Ken Onion designed Foresight™ for the first time, you instantly begin to realize how natural the shape feels. The sweeping curves in the cold-forged aluminum handle form with its “swept” finger grooves draw your fingers in, and make you feel as if you could never lose your grip even during hard use. And, the Foresight™ blade quickly opens for business with a simple finger motion on the flipper style blade opener. Ken used one of his signature deep bellied, drop-point blade shapes for additional cutting prowess. Blade movement is silky smooth with the IKBS™ ball bearing pivot system, and blades are coated with black titanium nitride for tough, non-glare finish and added corrosion resistance. Stainless steel InterFrame construction gives solid footing to the hardware while at the same time creating a sturdy locking liner. A low-profile carry clip keeps the knife at the ready in any pocket you choose. So, stop looking back to see what could have been, and focus your sights ahead to see what can be.

K220KKP [MSRP \$140.00]

K220KKS [MSRP \$140.00]

Specifications

* Mentor Group U.S. Patent No. 5,822,866

Strong, lightweight, black anodized aluminum handles are shaped for "high speed—low drag" use.

Push button opener and patented* safety.

Precision machined parts built to last.

Non-glare, modified tanto blade shape with a razor-sharp cutting edge.

Model M16®-04A

Modified Tanto tip is ideal for piercing and tough use tasks.

NOTICE: The sale of automatic knives is Federally regulated. Always check permissibility within your state or locality as non-Federal personnel may be precluded from ownership or use by state laws.

Push button release/opener with patented*, positive safety that locks in the blade-open and blade-closed positions.

Removable, stainless steel carry-clip is mountable on either handle side for easy access carry.

M16®-04A

CARSON DESIGN

**Doing Your Job Is Tough Enough On Its Own—
So Having the Proper Tools Should Just Be Automatic.**

Here's a tactical folder destined for the ages... Not only do you get the battle tested and performance proven platform of the Kit Carson designed M16® but, you get it with the added kick of an auto-opener. This all business cutting tool gets its superior lineage straight from the M16® design. Its 4.0" modified tanto blade readily opens in a flash with the push of the auto release button. In addition, the auto mechanism features a patented* safety on the handle spine, which effectively locks both in the blade-open and blade-closed positions. The signature M16® handle design is profile contoured and purposefully skeletonized for mobility and secure grip. You get all of the top-shelf performance you need, packed into a sleek, duty ready tool. With the risks you take, would you really want anything less? Made in the U.S.A.

*** The M16®-04A Is Only Available Through Authorized Distributors.**

M16®-TITANIUM

CARSON DESIGN

For Straight Up in the Trenches Tough Tool Performance, and Never Back Down Near Indestructible Reliability—The Choice Has to Be This Knife.

The M16® knife is one design that has proven itself a formidable piece of gear to have along. Knifemaker Kit Carson created the knife to deliver great cutting utility and strength, harnessed by a handle platform with positive control and lasting reliability. The M16®-Titanium definitely ups the ante a bit with its CNC machined titanium handles. The result is a better strength-to-weight ratio than steel or aluminum and its inherent "ground zero" toughness. Blades are offered in several configurations, each ground of high quality stainless steel and sharpened to meet the challenge. And one-hand opening is quick with the Carson Flipper, and backed up with the patented* AutoLAWKS™ safety mechanism for reliable safety. Three model choices give you options and the opportunity to have the knife that best meets your needs. So, if you prefer your gear of the overbuilt variety, the M16®-Titanium is tough to beat.

Specifications

M16®-01T: Razor-Sharp Cutting Edge
Blade: Length: 3.125" [79 mm]
Thickness: 0.098" [2.5 mm]
Steel: AUS 8, 58-59 HRC

Closed: Handle length: 4.00" [102 mm]
Open: Overall length: 7.13" [181 mm]
Weight: 2.4 oz. [68 g]

M16®-13T: Combined Razor-Sharp & Triple-Point Serrated Cutting Edge
Blade: Length: 3.50" [89 mm]
Thickness: 0.118" [3.0 mm]
Steel: AUS 8, 58-59 HRC

Closed: Handle length: 4.625" [117 mm]
Open: Overall length: 8.25" [210 mm]
Weight: 3.4 oz. [96 g]

M16®-14T: Combined Razor-Sharp & Triple-Point Serrated Cutting Edge
Blade: Length: 3.99" [102 mm]
Thickness: 0.138" [3.5 mm]
Steel: AUS 8, 58-59 HRC

Closed: Handle length: 5.25" [133 mm]

Weight: 5.7 oz. [162 g]

* U.S. Patent Nos. 5,596,808 and 7,437,822
Available in claspknives as M16®-13TC and M16®-14TC.

It's a work of precision machining art in titanium that produces an almost indestructible frame.

M16®-T models come with the AutoLAWKS™ safety, which automatically makes them virtual fixed blades when opened and locked.

[M16®-Titanium]

M16[®]-ZLEK

CARSON DESIGN

By Popular Demand the M16[®]-Z Gets Some Added Features Especially Suited for Law Enforcement and Emergency Service Professionals.

The Kit Carson designed M16[®]-ZLEK is an extension of the popular M16[®]-Z, complete with the patented* AutoLAWKS™ safety mechanism. We took the field requests of working professionals and developed a more “service” focused tool just for you. For professional use, there’s a seat belt cutter incorporated into the Carson Flipper so you can quickly and safely slice through safety belts or webbing. At the butt end of the knife is a tungsten carbide window breaker that makes side and rear automobile window extraction a snap. And all tool components receive a tough tactical black coating to not only better protect them from the elements, but also to “dress them down” to a professional look as well. So, if you’re a professional who seeks to have the right tools, this is one piece of gear that will be there when you need it.

M21™ SPECIAL FORCES

CARSON DESIGN

These Knives Are Every Bit the High-Performance Tool Which Your High-Risk World Demands. Every Day. Every Time.

Special Forces are regarded as high-value assets, used in situations where their elite military skills are warranted. Much the same is the M21™-SF with its performance minded features and superior design. Retired Sergeant Major and knifemaker Kit Carson incorporated the essential feedback from military and law enforcement professionals when he set out to design this knife. Based on our M21™, this design uses a versatile, deep-bellied spear-point blade shape, but with the addition of a second Carson Flipper on top, resulting in a true hilt for added blade safety. And the handle uses our InterFrame build skinned with either machined aluminum or G10 scales that are fully radius contoured to supplement hard use. The series features the CRKT® patented² AutoLAWKS™ safety, which provides piece of mind by locking the blade fully open. All knives in this series are equipped with four-position carry options on belts or webbing [Caution: These knives are not designed for tip-up in-pocket carry]. The M21™-SF models are anything but ordinary and built for the same.

M21-14SF [MSRP \$135.00]

M21-14SFG [MSRP \$99.99]

Specifications

M21™-14SF: Aluminum Scales, Deep-bellied spear point blade, Combined Razor-Sharp & Triple-Point Serrated Cutting Edge

Blade: Length: 3.99" [101 mm]
Thickness: 0.140" [3.6 mm]
Steel: AUS 8, 58-59 HRC

Closed: Handle length: 5.375" [137 mm]

Open: Overall length: 9.31" [236 mm]

Weight: 5.7 oz. [162 g]

M21™-14SFG: G10 Scales, Deep-bellied spear point blade, Combined Razor-Sharp & Veff Serrated Cutting Edge

Blade: Steel: 8Cr14MoV, 58-59 HRC

Weight: 6.2 oz. [176 g]

1. U.S. Patent No. D559,939
2. U.S. Patent Nos. 5,596,808 and 7,437,822

Special Forces]

Stainless steel pocket clip is movable to four different carry options.

Patented¹ Veff™ Serrations are ideal for fast cutting of fibrous materials.

Model M21-14SFG

Available in clampack as M21™-14SFC.

A true hilt, AutoLAWKS™ safety, and four-position knife clip give the most folding knife possible in high-stress tactical situations.

The M21™-14SFG blade has a deep-bellied cutting edge, combination Veff Serrations, and an extremely strong spine.

M16[®] SPECIAL FORCES

CARSON DESIGN

We Consider Them Folding Fixed Blades, But You Just May Want to Refer to Them as One of the Best Tactical Knives to Come Along in Years.

For the military or law enforcement professional, having a quality knife can mean the difference between having a good day or a bad one. And a bad day in your line of work can be serious stuff. The Kit Carson designed M16[®]-SF models are built with the professional user in mind starting with premium stainless steel blades, shaped and ground to very effective cutting edges. Also, incorporated into the blades is the double Carson Flipper which serves not only as a fast and efficient blade opener, but also as a true hilt for added tool safety. Our patented¹ AutoLAWKS™ safety mechanism creates fixed blade like reliability for peace of mind operation. The open InterFrame build handles make for solid grip confidence, ease of tool maintenance by design, and are available in either aluminum or G10 scales. Beyond that, all metal surfaces are non-reflective black coated as well. All knives in this series are equipped with four-position clip carry options on belts or webbing (Caution: These knives are not designed for tip-up in-pocket carry). It's a knife designed and built for the rigors of your world.

2. U.S. Patent No. D559,939

Available in claspbacks as M16-13SFC, M16-13SFGC, M16-14SFC, and M16-14SFGC.

The SFG models feature our exclusive Veff™ Serrations for rapid cutting through cord, rope, and vegetation.

We offer two true left-hand models. The AutoLAWKS™ safety lever and locking liner are reversed for lefties.

[M16[®] Special Forces]

Stainless steel pocket clip is movable to four different carry options.

Open InterFrame build makes knife maintenance easy.

Patented² Veff™ Serrations are ideal for fast cutting of fibrous materials.

Model M16-13SFG

SPECIAL FORCES DESERT G10

CARSON DESIGN

All of The Same Great Features as Our Other Special Forces Knives—But in a Sand Color Scheme for Desert Troops.

Just like their black tactical counterparts, these knives share a unique design offering a combination of Carson SF series features requested by military procurement specialists, including the patented² AutoLAWKS™ safety mechanism. All have combined Razor-Sharp and patented¹ Veff™ Serrated edges. The open build allows two Carson Flippers to be incorporated in the SF models, resulting in a true hilt. Blades are available in several styles and are titanium nitride coated for corrosion resistance. And the open InterFrame build uses stainless steel liners with Desert Tan G10 scales with their optimum gripping texture and inherent insulating properties making them cooler to the touch in hot environments. The SF knives in this series are equipped with four-position carry options on belts or webbing [Caution: These knives are not designed for tip-up in-pocket carry]. Now you CAN match your professional knife with your desert surroundings without compromising tool quality.

DESERT TACTICAL FOLDERS

CARSON DESIGN

Proven M16® Designs Developed Specifically to Blend Into The Desert Environments.

It may seem trivial to some, but for those who serve in harms way, having the right gear is essential. Not only is performance quality paramount, but having it blend with the rest of your gear can make the difference, too. These Desert Tactical folders mimic other designs in our professional line, but they are finished out in Desert Camo or Desert Sand color schemes. There are several sizes, blade styles, and handle materials offered so you can select the one that best suits your needs. Know that each is built to our CRKT® professional tool standards along with having our exclusive patented* AutoLAWKS™ safety, which automatically turns folders into virtual fixed blades in the open/locked position.

FIRE SPARK™

CRKT® DESIGN

This Hefty Tactical Design Combines Everything We Know About Folders, Including Fire Safe®, OutBurst® Assisted Opening and LAWKS® Safety.

The word "tactical" means strategic, deliberate or purposeful. Which is exactly the mindset we had when we developed the Fire Spark™. Its robust chassis features ample finger choils for solid grip and it packs a multitude of our finest technological advances to make tool function a fluid motion of mechanical edge. The innovative construction uses our rigid InterFrame build with stainless steel liners. Aluminum scales are CNC machined to form, and they feature G10 inlays to supplement their toughness. Blade style is a modified tactical spear point with a high hollow grind and swaged top edge for improved penetration. The Fire Spark™ combines our patented OutBurst® assisted opening with the patented¹ Fire Safe® mechanism to secure the blade until you need it open. Also, our patented² LAWKS® manual safety effectively converts the folder to a virtual fixed blade with a push of a lever. It all culminates into one very tough tactical knife.

Specifications

FIRE SPARK™

1050: Satin Blade, Silver Anodized Frame, Black Scales, Razor-Sharp Cutting Edge

1050K: Black Oxide Blade, Frame, and Hardware, Black Scales, Razor-Sharp Cutting Edge

Blade: Length: 3.875" [98 mm]
Thickness: 0.121" [3.1 mm]
Steel: 8Cr14MoV, 58-59 HRC

Closed: Handle length: 4.75" [121 mm]
Open: Overall length: 8.63" [219 mm]
Weight: 5.3 oz. [150 g]

1. U.S. Patent No. 7,918,028
2. U.S. Patent No. 5,596,808

The OutBurst® assisted opening mechanism cannot be actuated until you press the Fire Safe™ stud and nudge it.

The butt features a lanyard loop and stainless steel back spacer ending in a pointed "skull cracker" tip.

ERASER™

MAH DESIGN

A Professional Level Tool That Is as Solid as It Is Functional.

Designer Liang Mah uses a bold profile to shape his vision of tactical. The Eraser™ locking liner folder is designed and built to perform in your world. Its modified tanto blade wields a strong point for tough piercing into a variety of materials, and its elongated cutting edge can go the distance as well. And, opening the blade is rapid with use of the flipper on the spine. Another added feature is the patented* LAWKS® manual safety mechanism so you can secure the blade when open. The robust Eraser™ handle has a slight bend at the fore end to create a more substantial grip form for thrusting. The handle shape also affords a nice blade guard as well as a generous pommel. The machined G10 scales are radius contoured to fill the grip and the full, stainless steel liners create a formidable foundation for tough use. All in all, the Eraser™ is one hell of a tactical folder that can take every bit of what you can dish out.

- Blade:** Length: 3.875" [98 mm]
Thickness: 0.14" [3.6 mm]
Steel: AUS 8, 58-59 HRC
- Closed:** Handle Length: 5.00" [127 mm]
- Open:** Overall Length: 8.75" [222 mm]
- Weight:** 6.2 oz. [176 g]

*U.S. Patent No. 5,596,808

Model 8900

Modern blade design offers optimum cutting geometry and overall knife balance.

Overbuilt knife butt enhances overall build integrity.

Blade flipper makes opening simple and rapid. Also is a very effective finger guard in the open position.

Model 8900K

The best of everything comes in the form of a flipper opener and the LAWKS® manual safety mechanism.

An oversized pommel end design is built tough for hard use, and a movable stainless steel clip provides easy access carry.

TACTICAL

CRIMSON TRACE® TOOLS

If You're a Crimson Trace Fan, or a Shooter—Then Here's Two Compact Tools Well Worth a Place in Your Range Bag.

In collaboration with Crimson Trace, CRKT® has helped to develop these handy tools for adjustment and maintenance of the CTC products as well as a multitude of other tasks. The **RBT™** [Range Bag Tool] is a shooter's utility pocket tool designed by Glenn Klecker. It's a secure carry platform for two essential Allen wrenches for CTC sight adjustment. In addition, it has a high carbon stainless steel blade, fold-out screw-driver blades, plus a bottle opener. The tool shell is molded glass filled nylon.

Next is the **Picatinny Tool™** which is the ideal serious shooter multitool with special functions for AR15-style carbines. Designed for CTC sight adjustments and to ease the breakdown and cleaning of semi-automatic pistols and rifles. Includes hex wrench driver, hex bits [small flat, Phillips, Torx® 20 and Hex 3/32], knife blade with scraper edge, 8mm wrench, and a fold-out pin to clear jams or remove slide release pins. And, there are two Allen wrenches for your CTC sight adjusts. Tool body is molded reinforced nylon stylized for grip. If you are a shooter these are two handy tools to have. And if you are not a shooter... Why not start?

Model 8970

Implements fold neatly into tool body for compact carry.

Model 8975

Bit drivers and hex wrenches friction fit into tool body for secure storage and carry.

8970 [MSRP \$19.99]

8975 [MSRP \$49.99]

Specifications

CTC RBT™

8970: Knife, flat and Phillips screwdrivers, bottle opener, .028 and .050 Allen wrenches, clip
Blade: Combination serrated
 Length: 1.875" [48 mm]
 Thickness: 0.072" [1.8 mm]
 Steel: 5Cr13, 51-53 HRC
Closed: Handle length: 2.625" [67 mm]
Open: Overall length: 4.5" [114 mm]
Weight: 2.8 oz. [79 g]

CTC PICATINNY TOOL™

8975: Knife, ejection pin, 8 mm wrench, scraper, hex bit driver with small flat head, Phillips, Torx® 20 and Hex 3/32 bits, .028 and .050 Allen wrenches, clip
Blade: Combination serrated
 Length: 2.75" [70mm]
 Thickness: 0.113" [2.9 mm]
 Steel: 8Cr14MoV, 58-59 HRC
Closed: Handle length: 4.00" [102 mm]
Open: Overall length: 6.75" [171 mm]
Weight: 4.7 oz. [133 g]

Each CTC tool has relieved slots to hold their two sight adjustment Allen wrenches securely.

The Picatinny Tool fold-out hex driver accepts the four bits provided, which are stored in slots in the handle.

ACTUAL

SHENANIGAN™ T

UNION DESIGN

An Effective Tactical Folder, Designed and Built to Hold Up to the Rigors of Duty Whether It's On the Streets, or In the Field.

Custom knifemaker Ken Onion uses his form and function design prowess in the Shenanigan™ T folder, especially in the blade profile. The tanto blade shape is purposefully pointed for piercing while having a high hollow grind, which is ideal for a razor thin cutting edge. Blade actuation is quick and efficient with the use of the blade flipper. All blades are black titanium nitride coated for non-glare, corrosion resistance. The Shenanigan™ T handle shape provides confident grip through nicely profiled palm swell, overall dimensional balance and a swept finger groove. Available in either a forged aluminum or molded glass filled nylon, the handle features texture checkering for non-aggressive, effective grip. This locking-liner folder design offers all of the tactical “tool” qualities you need—without drawing unwanted attention with its clean, sleek look.

K490KKS [MSRP \$125.00]

K495KKS [MSRP \$69.99]

Specifications

SHENANIGAN™ T

K490KKS: Combined Razor-Sharp & Triple-Point Serrated Cutting Edge, Aluminum handle with inserts

Blade: Length: 3.25" (83 mm)
Thickness: 0.119" (3.0 mm)
Steel: AUS 8, 58-59 HRC

Closed: Handle Length: 4.875" (124 mm)
Open: Overall Length: 8.25" (210 mm)
Weight: 4.2 oz. (119 g)

K495KKS: Combined Razor-Sharp & Triple-Point Serrated Cutting Edge, Molded glass filled nylon handle

Blade: Length: 3.25" (83 mm)
Thickness: 0.119" (3.0 mm)
Steel: AUS 8, 58-59 HRC

Closed: Handle Length: 4.875" (124 mm)
Open: Overall Length: 8.25" (210 mm)
Weight: 3.8 oz. (108 g)

Handle shape is contoured and palm swelled for sure grip, bare handed or gloved.

Blade flipper is quick and simple to use.

Model K490KKS

Modified Tanto blade shape with partially serrated recurved cutting edge is an effective tactical use combination.

Features flipper opener and comes with removable stainless steel carry clip for easy access.

The cold forged aluminum handles [K490KKS] are designed with pocket inlays of soft, molded inserts with checkering for grip.

TACTICAL

Paracord handle wrap and fob enhance grip and can be used for cording in survival situations.

Custom form fit sheath with patented attachment system.

Model 2030CW

Robust blade tang for added strength and edge toughness.

TACTICAL

TRIUMPH N.E.C.K.™

CRAWFORD DESIGN

A High Speed, Low Drag Fixed Blade Design That Packs the "No-Nonsense" Cutting Versatility and Toughness You Need in the Field.

Designed by knifemakers Pat and Wes Crawford, both of the Triumph N.E.C.K.™ [No-nonsense Emergency Compact Knife] models are founded on a beefy 0.14" thick stainless steel full-tang skeletonized blade design. A recurved dual-grind Tanto blade style features a false top edge grind for optimum penetration power. Available as a satin finish model, or with black EDP coating and OD green paracord handle wrap. Both models include a custom molded sheath with a patented* quick-release belt-mounting system. The belt clip can be attached for either vertical or horizontal carry. The cord-wrapped handle version includes our Biotac™ harness carry system [see page 88 for details]. Looking for versatile carry back-up options? You should try a Triumph N.E.C.K.™ on for size.

This patented belt clip system allows instant attachment and removal from belts, webbing and equipment.

The 2030CW comes with an olive drab cord-wrapped handle as well as a Biotac harness carry system.

M.A.K.-1™ & EXTRIK-8-R™

MCGOWAN DESIGN

**Indispensable Rapid Entry and Extraction Tools
Designed for Emergency Rescue, SRT or Military Use.**

Canadian firefighter James McGowan uses his real-life experiences to develop cutting and rescue tool designs. He understands how valuable having the right tools for the job truly is. The M.A.K.-1™ (Multiple Access Knife) is a rescue and rapid entry knife, made of stainless steel with its blunt chisel pry-bar tip for opening doors and windows, along with a Razor-Sharp knife edge suitable for heavy cutting or hacking tasks. The heavily textured and grip grooved G10 handle scales provide optimum control even when wearing heavy gloves. A twist breaker groove allows controlled breaking of auto side windows, while a carbide tip butt-breaker easily and rapidly breaks structure windows or auto glass. The M.A.K.-1™ is offered in several finishes and sheath configurations. The Extrik-8-R™ seat belt cutter and basic multi-tool incorporates finger holes and grip grooves for even a secure gloved hold. Other tool features are an oxygen bottle wrench and both blade and Phillips screwdriver tool ends. For the ultimate tool package, consider either the M.A.K.-1™ System or M.A.K.-1™ Tactical System.

E.R. KNIVES

KOMMER & CARSON DESIGNS

Special Purpose Cutting Tools Designed and Built with the Professional User in Mind.

Emergency services personnel take their jobs seriously so it only makes sense that they expect the same out of their tools. By taking feedback from service professionals, we took several favored designs and enhanced their performance qualities even more through materials and features geared for tough service. The Russ Kommer designed Bear Claw™ E.R. has a blunt tip and serrated edge for cutting seat belt, webbing, or entanglement. Versatile tool carry options come through in a molded sheath. The renowned Kit Carson designed M16® knife provides several optimum tool platforms from which we further developed for your specialized needs. Whether it's the M16®-12ZE, the M16®-13ZE, or the M16®-14ZER—know that you can count on their full potential. From the brightly colored reinforced nylon scales to the patented¹ AutoLAWKS™ blade safety, they are ready for tough duty.

The folders feature a seat belt cutter on the Carson Flipper, plus a removable stainless steel clip and AutoLAWKS™ safety.

We added a tungsten carbide window breaker to the folders to make it easy to shatter car side windows in one fast impact.

TACTICAL PENS

ELISHEWITZ DESIGNS

To Everyone Else They're Stylish Writing Instruments Designed with All of the Fine Qualities You Would Expect in a Nice Pen—But to You They're More Than That.

A former Recon Marine with his decades long martial arts training, and an immersion in the Far Eastern cultures, helped custom knifemaker Allen Elishewitz to design these Tao® and Tao® Ti pens. Each is a clean, futuristic interpretation of one of mankind's basic tools, much the same as Allen's many successful knife designs. The tactical pens are high-tech writing instruments that can be used as self-defense enforcers if need be. Made of either precision-machined aluminum or titanium (depending on model), and hard-coat color anodized, they offer lasting durability and toughness. The heavy caps are threaded so that they will not pull off in use, and are castellated for greater impact. The flutes, grooves and body tapers on the pens, combined with the pewter-toned stainless steel pocket clip, provide a secure grip. With some basic instruction or knowledge, one can readily use the pens against an assailant or attacker to inflict notice, pain or injury—thwarting an otherwise potentially defenseless situation. And, they're just plain great writing instruments as well.

TPENT [MSRP \$200.00]

TPENAOD [MSRP \$69.99]

TPENAK [MSRP \$69.99]

TPENABS [MSRP \$69.99]

TPENAKS [MSRP \$69.99]

Specifications

ELISHEWITZ TAO® TI PEN [Titanium]

TPENT: High-polish bright finish; TC6-64 Titanium
Pen: Overall length: 5.31" [135 mm]
Diameter: 0.63" [16 mm]
Weight: 1.9 oz. [54 g]
Refill: Fisher® Space Pen #PR4

ELISHEWITZ TAO® PEN [Aluminum]

TPENAOD: Nonreflective Olive Drab
TPENAK: Nonreflective Black
TPENABS: Brown with Bright Grooves
TPENAKS: Black with Bright Grooves
Pen: Overall length: 5.75" [146 mm]
Diameter: 0.63" [16 mm]
Weight: 1.7 oz. [48 g]
Refill: Fisher® Space Pen #PR4

TAO® TI PEN comes with a silver/grey color nylon fabric, zippered case with foam insert.

TAO® PENS come with an olive drab color nylon fabric, zippered case with foam insert.

Stainless steel clip for convenient carry.

Model TPENABS

Model TPENAOD

Model TPENAK

Model TPENT

Pens use a Fisher® Space Pen ball point cartridge for write anywhere qualities.

The Tao® Ti pen cap has a conically shaped end for use as a blunt implement in a self-defense situation.

BIOTAC™

VAN HOY DESIGN

It's a Clever System for Simple, Versatile Carry of Fixed Blade Knives.

Custom knifemaker and inventor Ed Van Hoy developed this unique carry system to make "packing" your fixed blade knife as versatile as possible. Use it for any fixed blade knife/sheath design that uses a positive, secure locking system.

Carry options include **1. Standard** carry around the neck, fully adjustable for length; **2. Bio Neck** carry with underarm retention; **3. Bio Neck** carry with halter retention; **4. Waist** carry, left or right; **5. Under Shoulder** carry with underarm retention; and **6. Small of Back** carry with dual shoulder cords.

BIOTAC [MSRP \$9.99]

Specifications

BIOTAC™
 Length: To fit 50" [127 cm] chest
 Cord: Mil-Spec 550 Parachute Cord
 Weight: 1.0 oz. [28 g]

Biotac™ is ideal for open or concealed carry and fully adjustable for small to very large fixed blades. So comfortable and lightweight you will wear it everyday. [Knife not included]

MOLLE-LOK™

BLADE-TECH™ DESIGN

Makes Attaching Gear and Knives to Your Molle Equipped Items Simple and Secure.

A system developed for military use to make mounting and attaching the diversity of essential gear to their uniform components such as vests, pants and packs a simple, reliable process. The pliable "straps" secure/mount to the piece of gear, and are then threaded through the stitched webbing slots on the clothing or packs. The Molle-Lok™ snap-clicks closed, securing the gear in place until you are ready to physically detach by reversing the mounting process.

9800 [MSRP \$12.99 / Pack of 2]

Specifications

MOLLE-LOK™
9800: Single Molle-Lok
 Open Length: 7.63" [60 mm]
 Thickness: 0.130" [3.3 mm]
 Weight: 0.5 oz. [14 g]

* U.S. Patent No. 6,145,169

Molle-Lok is a trademark of Blade-Tech Industries, Inc.

Mounts to sheaths or accessories, and then threads through stitched webbing "loops" to secure to clothing or packs.

COMPANY BILLBOARDS

Quality CRKT Knives and Tools Make Desirable, Affordable Promotional Items for Your Corporate or Specialty Needs—Perfect for Awards, Premiums and Gifts.

These days it helps to have that competitive “edge” in the marketplace by making your company stand out from others. Having a quality premium to create a more distinctive and lasting impression is easy with our product-marking program. Many CRKT® models can be imprinted with your company name, logo or promotional theme to promote your product or service for years to come. A variety of durable imprint colors are available for high quality, detailed printing of your unique identity on the blade, handle or sheath. Blades and metallic handles can also be decorated with fine, detailed laser engraving.

CRKT® knives are something that get used in many ways every day, so you can be sure that they will not be put away in some drawer, rather they’ll be a constant, usable, visible reminder of your company brand. They are meaningful tools that the recipient will surely appreciate. And, for those that may be looking to add a great little accessory product to their line... What better than one of man’s most essential tools to compliment your products or services?

CRKT® can help you get the design, build and price point that you need. If you are interested in using CRKT® products for your company needs, please call or fax with company information and your imprint/product specifications, and we will get your customized items started.

Knife blades can easily be laser marked with your logo or artwork in great detail.

We offer several different methods for marking knives and tools, so you can select the one that best suits your needs.

Depending on the knife model, handles are another great location for placing your logo or promotional artwork.

Coated blades mark easily and offer nice detail and image contrast for visibility.

THE KNIFE DESIGNERS & THEIR PROFILES

Here are several of the custom knife designs that began the discussions.

Meet the Designers Who Have Worked Hand-In-Hand with CRKT to Translate Their Creative and Innovative Designs Into Affordable Production Knives.

These are the people who make this catalog possible. From the beginning, Columbia River Knife & Tool has sought out the best custom knifemakers, and we have worked closely with them to produce production versions of their custom designs. In recent years, we have also worked with bright young industrial designers, who have given our product line an entirely different look.

“We are proud to have an association with some of the finest custom makers in the world, and truly appreciate their passion for designing, innovating and improving knives. It is a sincere pleasure to work with each of them.”

Rod Bremer, CRKT President

We think it's important that these designers are recognized and receive credit for their work. While not every creative new design has been a big seller, we are proud of our record of awards from national and international knife shows, and we expect to continue to provide exciting new designs. No, everything hasn't been invented yet, and as we say, “We won't make dull knives.”

Jim Hammond was the first knife-maker to work with CRKT, beginning in 1994. His designs for CRKT folders set new standards of construction for production folding

knives. After graduation from Clemson University in 1977, Jim became a full-time knifemaker, specializing in military and collector grade tactical fighters and folders. A Knifemakers' Guild member since 1978, he is noted for his exquisite and prized work in many different styles for folders and fixed blades. His company, Hammond Knives & Designs, LLC, is in Arab, Alabama. His favorite pastimes when not making knives include golf, travel, and fishing. Jim says about knife design: “Excellence, flair, function—three fundamental keys of quality I strive for in each knife, making each aspect a celebration of style, while maintaining the vision of a design's purpose and application.” He is the designer of many CRKT® products including the FE9™ Series. All of his designs are strong and graceful statements.

Kit Carson of Vine Grove, Kentucky, is a retired professional soldier, rising to the level of Sergeant Major. He has made knives for 30 years and has been a full-time

knifemaker since 1993. He is a voting member of the Knifemakers' Guild. Kit has been an avid hunter and fisherman for over 40 years, growing up enjoying the woods and trout streams in the mountains of north Georgia. About his philosophy of knife design, he says: "I strive to follow form and function in the knives I design and build. My reputation has been built around solid working knives, both fixed blade and folders. All the time spent outdoors as a young man and the time spent around the world with the Army has strongly influenced the knives I create." Nothing reflects this approach more than the Carson Design of our M16® series, which is built for function, not to follow fads. This highly successful knife series was named one of the Top 10 Factory Tactical Folders of the Decade by Blade magazine. The M16-14M won a comparison test conducted by the German Messer magazine.

Ed Halligan "Big Daddy K.I.S.S." was the second noted knifemaker to work with CRKT. After 37 years as an aircraft technician with Delta Airlines, he founded Halligan Knives in

Sharpsburg, Georgia, in 1985—when he says his background in scrimshaw and leather working fell in line with his interest in stock removal knifemaking. In 1996 he earned a Mastersmith rating from the American Bladesmithing Society and won the B.R. Hughes award for Best Knife by a Mastersmith. He does all his own work, including heat-treating, forging, and making Damascus steel for his own use in various patterns. In addition to three-dimensional carved knives, he makes self-defense, military and folding knives. He is the inventor of the K.I.S.S. [Keep It Super Simple] single-sided knife series which has been widely copied, and has been translating his custom versions of it into CRKT® production knives, which have proven to be exceptionally popular with knife enthusiasts and the general public. He teaches bladesmithing seminars and knifemaking at the college level.

A.G. Russell has been deeply involved in the knife industry for over forty years. A.G. was the first member of the Knife Digest Cutlery Hall of Fame, was a founding member of

the Knifemakers' Guild, founded The Knife Collectors Club™, started the first knife mail order business, and produced the first commemorative pocket knife. In 1968, he founded the first "after market" for knives, the A.G. Russell List of Knives for Immediate Delivery. His mailing list was used to found the first two knife magazines, Knife World and The American Blade, now Blade. In the early 1970s, he arranged the first collaboration between a knifemaker and knife manufacturer. He designed and produced the first linerless pocket knife with all-plastic handles in 1970. In 1975, he designed a unique boot knife he called the Sting™, a small knife intended for hunting and personal defense. In 1987, he introduced the A.G. Russell™ One Hand Knife™ which was one of the first production knives to use a blade thumbstud for one-hand opening.

Pat Crawford and his son **Wes** are recognized as leading practitioners of the bladesmith's craft. Their company, Crawford Knives, is located in West Memphis, Arkansas.

Pat, a pioneer in the combat folder genre, has been a member of the Knifemakers' Guild since 1973. He was among the first to integrate titanium into his folders, and to skeletonize his frames and handles to reduce weight and enhance the grip of the knife. He uses the stock removal method, specializing in high-tech, self-defense tactical folders, favoring different and unique knives. Crawford handle materials include wood, ivory, stag horn, Micarta™, and other exotic materials which are available. They also offer options such as file work, inlays, fancy pen work and special customer requests. Pat says, "The reason I make knives is for the personal satisfaction I receive in being my own boss, and producing a thing of beauty that will stand the test of time." Pat and Wes designed the CRKT® Triumph N.E.C.K., and Natural series.

Brian Tighe is a Canadian "Renaissance man": tool and die maker, photographer and extraordinary custom knifemaker. He says, "I started making knives because I

always carried one and had a passion for them. When I was first introduced to custom knives, I knew I could make them as well, got hooked and never looked back. I test my knives by carrying one every day, and I use it for everything I need to do around the house and work. I also get a lot of feedback from customers who use my knives to make their living." Pat Covert of American Handgunner has said, "Brian Tighe has risen from the rank and file of edged weapons artisans to the rarified air of the top 10 elite. His sense of design is extraordinary, his pride of workmanship exemplary. These are qualities that have propelled Tighe to the top." Brian won the "Most Innovative Design" award at the 2012 BLADE Show, which was his second time for this award having won it prior in 2010. He was also awarded "Best Folder" at the 2012 Canadian Knifemakers Guild Show. His custom workshop is in Ridgeville, Ontario.

Ron Lake is a custom knife-maker in Eugene, Oregon. He joined the Knifemakers' Guild in 1971, and has been a full-time knifemaker since 1972. He has

received numerous awards, has been featured in national knife, shooting and general interest magazines, and has conducted folding knife seminars around the world. He co-authored the book "How To Make Folding Knives" in 1988. He was elected to the Cutlery Hall of Fame in 1998, and was labeled by sportswriter B.R. Hughes as the "Father of the Modern Day Folding Knife." He is a partner with Michael Walker in Lake & Walker Bullfrog® Knives, developer of the patented knife blade lock safety known as LAWKS®, and also invented the L.B.S.™ lock back safety system. Knives made by Ron are included in the collections of the Smithsonian Institution, the National Metal Museum, the National Knife Museum and the Randall Knife Museum. He has also designed many knives for CRKT®, including the Lake 111 lock back line.

THE DESIGNERS

Russ Kommer of Fargo, North Dakota, has been a commercial hunting guide since 1980. He started making knives when one of his hunter clients brought a custom

knife and dressed an entire moose without sharpening it. He began working with noted Alaskan knifemaker John Shore, who took Russ into his shop and showed him how to grind. He began making his own line of knives in 1997, and his custom catalog shows a range of fixed blade knives, including Bowie and Camp Knives, Fillet Knives, Hunters, Fighters and Boot Knives, all available with a variety of exotic handles and with engraving. He is the designer of the CRKT® Bear Claw™, Big Eddy™ & CRKT® Fillets lines, hunting knives including the Bez Tine, 2-Shots, Free Range® Hunters, Surf 'N Turf®, P.T.S.™, plus the ExiTool®. He says, "I set out to make a quality knife that would perform and be comfortable to handle. I have found knifemaking to be my calling, and would like to thank all the people who have helped me along the way!"

Allen Elishewitz is a world-renowned custom knifemaker, whose studio is in Canyon Lake, Texas. His work has been featured in many magazine articles and front covers

as well as several museum-quality books. Collectors of his work include heads of state, members of royal families, members of elite special forces units and serious enthusiasts of fine craftsmanship. His early interests in knives, combined with his background in the martial arts and as a Recon Marine, led him to become one of the premier tactical knifemakers. With his classical art background, this self-taught artist has designed a wide range of innovative knife models as well as luxurious pens and watches. Over the years he has been a member of the Italian Knifemakers' Guild, American Bladesmith Society and Knifemakers' Guild where he served on the Board of Directors. His work has been awarded numerous prizes throughout his career. Allen is the designer of many successful models for CRKT, including the Elishewitz F.T.W.S.® tactical fixed blade and our Tao® tactical and titanium pens.

Ed Van Hoy has been making custom knives since 1975, specializing in folding and fixed blade Damascus designs. His home and studio are in Abingdon, Vir-

ginia. Ed is a member of the North Carolina Knifemakers' Guild and a voting member of the American Knifemakers' Guild. He received a degree in the art of metal engraving from Montgomery Community College. He has received too many awards to list, including the A.G. Russell Most Innovative Folding Knife, Guild Show 2002; Most High Tech Design-S.I.C.A.C., Paris, France 2002; Most Innovative Knife-Guild Show 2004; Best Fantasy Knife, Ohio Valley Knife Show 2005. For CRKT production knives his awards include: Overall Knife of the Year, Blade Show 2004; Import Knife of the Year, Blade Show 2005; Most Innovative Import Knife of the Year, Blade Show 2007. Ed is the designer of the Biotac™ carry system and his most recent work is the CRKT® Tool in collaboration with fellow designer Tom Stokes.

James Williams is a former U.S. Army officer with over fifty years of experience in numerous martial arts and combat-ives disciplines. He knows cutlery as President of Bugei

Trading Company, producer of fine Samurai swords. James is an expert in both ancient and modern martial arts. He has developed The System of Strategy, a unique approach to unarmed combatives based on the ancient samurai system of close-quarters combat. He is internationally known as a trainer of special operations units, government agencies, and law enforcement organizations, both foreign and domestic. James teaches combatives, self-defense, low-light tactics, and firearms. He is the designer of the popular Hisshou®, Shinbu™ and Hissatsu™ fixed blades; the Hissatsu™ and Heiho™ folders as well as a tactical pen and the new Otanashi noh Ken™, Sakimori™ and Flashlights. James states that the goal with the Hissatsu™ Folder "was not to replace the fixed blade knife, but rather to offer the best alternative possible when circumstances demand other options."

Michael Martinez and his father **Baltazar E. Martinez** have invented a number of products including the patent-pending Ultima™ fixed blade. Michael is a noted

sculptor in Albuquerque, New Mexico. A former student of R.C. Gorman, he specializes in large-scale bronze casting. Michael's work is in private and corporate collections internationally. He is President of Group Design, Inc., and Outside the Box, Inc., wide-ranging design firms, and 360 Degrees LLC, a tactical edged weapon training organization. As a former professional runner, he still runs 16 miles a day, and has missed workouts only 16 days in the last 35 years. He is also a student of the martial arts and is an active club boxer. His father Baltazar was a mechanical engineer working on classified nuclear system design for the defense department for more than 30 years. A registered engineer, he taught mathematics for engineering design at Massachusetts Institute of Technology and the University of New Mexico.

Frank Centofante, one of the pioneers of the custom knife movement, passed away in September, 2009, too soon to see his CRKT® Tribute™ lock back line become a production reality. He began making knives in 1969. He was a co-author of the book "How To Make Folding Knives" and an immaculate craftsman. Frank served on the Board of Directors of the Knifemakers' Guild for 20 years, serving as Vice President for three years and President for eight years. He received numerous awards both nationally and internationally and was granted a U.S. Patent for Folding Knife With Secondary Locking Mechanism. He was inducted into the Blade Magazine Cutlery Hall of Fame and was a recipient of the Knifemakers' Guild Red Watson Memorial Friendship Award, which is the only award voted on by members of the Knifemakers' Guild. He was also a member of the Corporazione Italiana Coltellinai, and was affectionately known throughout the industry as the "Godfather of the Guild."

Launce Barber is dedicated to discovering great design ideas by using the most fundamental tool we all share in common—our creative minds. His focus is to produce

innovative and creative design by discovering elegant new solutions for old problems. He feels that it's very important to partner with individuals and companies that are leaders in their industry and understand and share his long-term vision for a dynamic product. Launce and his long-time engineering and design partner, Tom Stokes, have won numerous awards for product design including the prestigious international iF Product Design Award Silver 2004, Most Innovative Import Design of the Year [Blade Magazine 2003], Best in Show [SHOT Show 2003], Best Buy of the Year [Blade Show & International Cutlery Fair 2007], SHOT Show's Best [Army Times 2007], 2008 IWA International Knife Award, and 2008 Blade Show Accessory of the Year. Launce and Tom's design collaborations and vision brought life to the CRKT Tool line.

Tom Stokes is an experienced product designer and mechanical engineer from the University of Virginia who has worked in the aerospace industry for over 20 years. Tom

has been involved in the knife and tool industry for over ten years and is experienced in the use of high-end CAD [Computer Aided Design] software and rapid prototyping technology. He has always enjoyed a design challenge and has been involved in many creative and interesting design projects including NASA wind tunnel research. His designs display a rare combination of artistic form and function. Tom has been instrumental in conceptualizing, designing, and engineering the tools seen in the CRKT Tool line with Launce Barber, including the Guppie, Li'l Guppie®, Zilla-Tool®, Zilla-Tool® Jr., and Get-A-Way® Driver. The CRKT® Tool with an Ed Van Hoy assist, and the CRKT® Micro Tool & Sharpener. The CRKT® factories continue to be amazed at his mastery of computer aided design when we deliver his final computer files for prototyping and manufacturing.

Tom Veff (a.k.a. "Edgeologist"), developed a love of knives at a very early age and was sharpening knives as far back as he can remember. At age 19, he entered

the meat industry cutting meat and managing meat markets for 20 years. Knives were always a part of his everyday life. In 1989, Tom established Veff Sharpening Service in Oregon City, OR which he still operates today. His reputation for producing a very highly polished, surgically sharp, convex edge has led to his customer base extending throughout the U.S.A. In 2006, he designed Veff™ Serrations, which have proven to be the most efficient and effective serration pattern to date, and are licensed exclusive to CRKT. In 2009, Tom developed the Veff Sharp™, 600 grit diamond sharpening system. And, in 2013 he introduced another new serration design called Veff™ Flat-Top Serrations, which are also exclusive to CRKT. Tom is never content to settle for the typical, average edge or cutting tool. He is always looking to develop new designs or improve existing ones. He loves to embellish knives, for those who inquire.

James McGowan of Toronto, Ontario, Canada, is an avid outdoorsman and Toronto Firefighter. He says, "I rely on knives daily. The limitations of factory knives became

evident, and I began collecting custom-made knives. This led to my passion which is creating my own handmade knives. Learning from veteran knife makers such as Murray St. Amour, Roger Toner and George Tichbourne, I developed my own formula for producing durable and aesthetically pleasing knives which can endure extreme conditions. The demands by friends and colleagues for my custom designed knives grew and through their encouragement I began offering my products to the public in 1998 as a member of the Canadian Knifemakers' Guild. My mission is to provide high-quality products for people who demand hard working knives." In his shop, J. McGowan Knives, he specializes in fixed blades using handle materials from the practical to the exotic. James is the designer responsible for the CRKT M.A.K.-1™ and Extrik-8-R™.

Alan Folts of Melbourne, Florida, has been making knives since 1992. During his college career he entered knives in Art Shows, winning "Best of Show" and honorable mentions.

He was also awarded a scholarship based on his artistic/design abilities. Upon moving to North Carolina in 1995, Alan joined the North Carolina Custom Knifemakers' Guild. Alan won "Best Fixed Blade" at the 10th Annual South-eastern Custom Knife Show. Alan is adamant about teaching and passing on the skills of custom knifemaking to others. Alan has been teaching knife enthusiasts and assisting other makers with their craft for many years. Alan specializes in both limited production small fixed blades and one-of-a-kind fixed blades and linerlock folders. He is best known for small blades, such as the CRKT® Folts Minimalist and S.P.E.W.™, that both function very well, have proper ergonomics, and a sleek and often futuristic design. He also makes custom neck knives, kitchen knives, swords and art collectibles.

Jon Graham of Cleveland, Tennessee, was born to a father who had an appreciation for knives, and at a young age he was taught the importance of a good

knife. "At the age of seven I got my first knife, and haven't been without one since." In the late '80s while stationed at Aviano AB Italy, Jon discovered handmade knives in a magazine and knew that was something he wanted to do. After getting out of the Air Force and settling into a job, Jon started making kit knives on a table with basic tools in 1994. Tired of making other people's designs, in 1999 Jon asked his brother Josh to go in on some equipment and learn how to make knives by stock removal. He has been hooked ever since, and constantly strives to improve his designs and skills, building on his experience as a diesel technician. Graham Knives specializes in utility tactical designs with an emphasis on E.D.C. fixed blade pocket knives, but his favorite knife line is the custom Razel™ with dual edges, which the company makes in many sizes and styles. He is the designer of the CRKT® Razel™ line.

THE DESIGNERS

Liong Mah is a designer working in the Dominican Republic. He says, "As a kid my uncle would give me pocket knives and I would see what I could change to improve

the design. My books would have knife drawings in them instead of school work. About ten years ago I started reading books on how to build folders. This helped me understand the anatomy of a folding knife. I learned how to use AutoCAD and that has really helped me to create my designs. I like to blend old styles with modern materials, to create a knife that is safe, functional and beautiful. I prefer blade and handle materials that are low maintenance, because I know that most people do not want to have to oil and wipe down their blade each time they use it. Doing collaborations has really helped me bring out my ideas. I have been very lucky to work with some of the best makers in the industry, including Allen Elishewitz, John W. Smith, Howard Viele, Edward Baca, Phil Boguszewski, Jeremy Marsh, Brad Southard and Keith Edick." He is designer of the CRKT® Eat'N Tool®, Eraser™ folder and Liong Mah Design #5 & #6.

MJ Lerch is a custom knife designer who has been encouraged by the knife making community to pursue her design interests. She has been immersed in custom

knife making for a long time with her years of working right alongside her custom knifemaker husband. They would collaborate on various design elements from time to time, and that has led to her developing some of her own designs. She says she gets some of her inspiration from the "spontaneous flow of nature." And, MJ knows her way around a machine shop as well, after having been in charge of running production for the family owned business. When she is not busy working on her next knife design, MJ enjoys spending time outdoors, or landscaping their property. She is quite the fitness enthusiast as well with her regiment of running, biking and swimming. MJ is the designer of the CRKT® Enticer™ folding knife.

Doug Ritter is an internationally acknowledged authority on survival equipment. He founded and publishes the renowned Equipped To Survive web site

[www.equipped.org] and is Chairman of the non-profit Equipped To Survive Foundation. Doug doesn't claim to be a knifemaker, but he is not shy about promoting the practical design features that he prefers to see in a functional survival tool. In the past few years that has evolved into successful limited production collaborations with a number of makers incorporating his functional knife design philosophy and an eye for simple, practical and beautiful blade design. Doug's aim is to maximize functionality and minimize all else, "everything you need, nothing you don't," as he puts it. The compact RSK Mk5™ is his first CRKT® collaboration and the first to be distributed widely through normal knife sales channels. Columbia River Knife & Tool is extremely happy to have an expert on personal and outdoor survival on board, and we hope to find other outlets for Doug's specialized expertise.

Ryan Johnson has been forging tomahawks and knives for over 27 years, Ryan has spent the last decade applying modern engineering to centuries old tool and weapon

concepts, redefining the role of the tomahawk in Law Enforcement and Military applications. Ryan is president and primary designer at RMJ Tactical, LLC, whose tomahawks have become a mainstay in the special operations community. Ryan resides in beautiful Chattanooga, Tennessee, with his wife and three daughters. Ryan is responsible for the Chogan™ and Kangee™ T-Hawk designs for CRKT®.

Steve Jernigan is a native Floridian and avid outdoorsman actively engaged in hunting, fishing, scuba and skin diving, spearfishing and underwater salvag-

ing. So, he has needed to have a knife in his possession pretty much all of his life. Steve made his first knife in high school, but got serious with the craft in 1982, and joined the Knifemaker's Guild in 1984. In 1989 he began making knives full-time and attended all of the New York and New Jersey international knife shows for the following 16 years; attended the Guild Show regularly as well as the Blade Show for the past 28 years. Steve's knife awards include the prestigious Beretta Gun Manufacturer's "Craftsmanship Award", "The Red Watson Friendship Award", "Best Folder of Show" award at the first Florida Invitational Knife Show as well as others. He enjoys making folders nearly all of the time, with most being quite ornate with complex inlays of various minerals. Steve uses several different locking systems, including a unique lock of his own design for double action autos. The CRKT® Persian Folder is Steve's design.

Flavio Ikoma is a Brazilian knife designer who says, "Since I was a kid, my life was influenced by blades, mainly the Japanese style swords and knives.

My first knives were made of bamboo. In my adolescence I started to work on knives in my father's shop, where I had access to new tools and materials. From the beginning, knifemaking has just come naturally to me as if it is in my blood, and my father always encouraged me. In 1986 I started my Mechanical Technician course, where I learned the basics of metallurgy. I started to make knives professionally for the Brazilian market in 1993, influenced by the guys from Korth Cutlery. In 2002 I invented IKBS along with the guys of Korth. This bearing system eliminates blade play and makes for a very smooth and fast action. In 2003 Duane Weikum helped me promote my knives in the U.S. market and establish my name. Making knives for me is not only a job I like, it is also a passion and an obsession. I make each knife as if it were for myself, a costly and time consuming method, but the only way to ensure the quality my customers demand and deserve."

THE DESIGNERS

Ken Onion is a custom knifemaker and designer who lives and works in Kaneohe, Hawaii. Ken was inducted into the Blade Magazine Hall of Fame in 2008 and is recognized as one

of the most innovative and successful knife designers of our time. He has been making custom knives since 1991 and invented the first commercially successful assisted opening mechanism in 1996, creating a new product class. He holds more than 36 patents on locks, gadgetry, mechanisms, safeties, and designs. He has collaborated on production designs with a number of prominent manufacturers, and conducts classes on knife technology around the world. He also teaches classes in design, knifemaking and business in his home state of Hawaii. In addition to cutlery, Ken has a wide variety of other product designs to his credit and in the works. Ken is the designer of the successful CRKT® Ripple™ and Eros™ folder series which incorporate the IKBS™ ball-bearing pivot system. His CRKT™ designs also include the Shenanigan™, Shenanigan™ T, Shakaulu™, and Onion Skinner. We are delighted to have him as part of the CRKT design team.

Ray Kirk received his Mastersmith rating in the American Bladesmith Society in 2005. He has been making and designing knives since 1989. His favorite now is

the integral that is forged from a round bar. He met a knife maker in 1994 that taught knife making at a local Vo-Tech who became his mentor and was his first contact with other makers since he started. Harry Fentress taught Ray how to hollow grind and valid heat treating principles. This greatly improved his knives performance. In 1995 he learned of the knife making properties of ball bearing steel, 52100. He has been forging knives from this steel ever since and has won many ABS cutting contests with it. Ray designed the CRKT® K.E.R.T., a key ring multi tool that was designed primarily as a seat belt cutter for emergencies. Other functions were added and it will continue to be improved as time goes on. It is a very simple tool that utilizes the key ring as an integral part of the tool. This enables the tool to be small and readily available for use when you need it.

Glenn Klecker, is an engineer with a passion for knife and tool design from the small town of Silverton, Oregon. Glenn was a decorated Captain in the U.S. Marine Corps during

Operation Desert Storm. His hobbies include camping, hiking and shooting both rifle and pistol in addition to designing creative knives and tools. His designs have been featured prominently in Blade Magazine and many other related publications in the US and in Europe and have won awards at the annual Blade Show several times as well as other design awards like "iF" and "iWA". In addition to his other designs with CRKT like "Nathan's Knife Kit" which he developed with his son Nathan, his innovative locking mechanism dubbed the "Klecker Lock" is now featured on numerous CRKT and other award winning custom knife designs including the NIRK™ family of knives.

WARRANTY

SPECIFICATIONS.

As we use more premium materials, we create more options and choices for the buyer. Remember that the colors and textures in this catalog are as close as modern reproduction processes permit, but variations occur in finishing processes such as anodizing and titanium nitride coating, in our swirled CPL scales, and G10, and in natural materials such as leather, horn and wood, so visit your local CRKT retailer and view actual products under natural lighting conditions to ensure complete satisfaction. Blade lengths in this catalog are measured according to 2006 American Knife and Tool Institute guidelines. For simplicity, we give the weight of models with a Razor-Sharp edge. Obviously, models with serrations will weigh a fraction of an ounce less. Specifications on CRKT products are subject to change without notice.

CRKT LIMITED LIFETIME KNIFE WARRANTY.

This warranty covers any defects in materials or workmanship. If one of our knives ever breaks or fails because of material or manufacturing defect, we'll replace the knife.

This warranty runs as long as you own your knife. Coverage ends if you sell or otherwise transfer the knife to someone else, or if your CRKT knife is modified in any way. This warranty does not cover breakage or failure due to misuse of the knife. Knives as good as ours rarely break or fail because of a defect. Usually they break or fail from what we call "tool abuse"—using them for unsuitable tasks like prying or pounding. Therefore, blade tip breakage is not covered by our warranty. Use of a knife for any purpose other than cutting voids the warranty. [Exceptions are the M.A.K.-1 models.] So please match the tool to the task, and use your knife only for cutting. The knife will last longer, and you'll be safer too. This warranty does not cover failure of mechanisms due to your failure to properly maintain them.

Also, consequential and incidental damages are not recoverable under this warranty. Some states do not allow the exclusion or limitation of consequential damages, so this exclusion or limitation may not apply to you.

Misuse of your knife can cause serious injury or even death.

It can also cause your knife to break or fail and the CRKT limited lifetime warranty will not apply. Failure to properly maintain your knife also may cause its mechanisms to not function properly, which could result in injury to you or damage to the knife. Follow the do's and don'ts which are included in your CRKT knife package and the knife will last longer and you'll be safer too.

CRKT ACCESSORY WARRANTY.

CRKT accessories, including deployment systems, and sharpeners have a one-year limited warranty against defects in material or manufacturing.

CRKT LIMITED ELECTRONICS WARRANTY.

The electronic portion of CRKT products, including L.E.D. systems are covered by a 90-day limited warranty from the date of purchase to the original purchaser. Warranty claims must be accompanied by proof of purchase.

NATHAN'S KNIFE KIT

KLECKER "JR." DESIGN

Teach Youngsters and Youth Basic Knife Construction, Safe Use, and Ownership Responsibility with a Hands-On Experience. Make It Fun!

Easy assembly, and then finish as you choose with stains, paints, etc.

All components are crafted of preformed soft wood.

Nathan Klecker, the youngster son of engineer and knifemaker Glenn Klecker, came up with this great idea while spending time with his dad in his homeworkshop. Nathan's Knife Kit is a "kid friendly" pre-cut, softwood knife assembly activity that is an excellent means to acquaint children seven years of age or older in the important fundamentals of knife safety and responsibility.

The kit is slightly oversized for easy assembly by young hands, and comes complete with instructions and knife safety education tips. Depending on the skill level of the child, the knife can be assembled from the bag by press fit, or it can be sanded, glued, sealed, stained, painted and decorated as desired. Either way, make the experience an enjoyable and memorable one for you and the child. And, we fully expect to receive tons of digital photos of the assembled knives so we can post the handy work to our Facebook page. We encourage all parents and knife owners everywhere to continue the tradition of responsible knife ownership, and more importantly to take the time to pass it along to future generations. We believe Nathan's Knife Kit can be an excellent first step. For additional learning resources we recommend the American Knife & Tool Institute's free, helpful downloads on knife education and knife selection information. Visit www.akti.org to learn more about your knife rights and how you can help protect them.

1032 [MSRP \$14.99]

Specifications

NATHAN'S KNIFE KIT

1032: Softwood Unassembled Model of a Lock back Folder
Blade: Length: 3.25" [83 mm]
Closed: Handle length: 4.625" [117 mm]
Open: Overall length: 8.00" [203 mm]
Weight: 1.8 oz. [51 g]

AGE: Recommended for children age seven and older.

The bamboo spring and wooden locking bar are precision cut and can be easily assembled by press fit.

Nathan's Knife functions like a real lockback when assembled. It can be glued as desired.
