

**FOX O.M.G. KAIMANO**  
**ITALIAN NAVY SPECIAL**  
**OPERATION UNIT**  
**COMBAT/DIVING KNIFE**

**KAIMANO** is the exclusive model of Italian Navy Special Operation Unit, and is built by following their strict specifications. The knife was developed with O.M.G. company that is one of the leading suppliers in Italy of diving material for the military. It has been tested very strictly in several conditions... It has been kept for more than one month inside sea water to test corrosion, and at the end has been selected as an official knife. All the features of the blade have been studied from the unit... We have followed their request for production of the knife and of the sheath that is applied in their respirators using the MOLLE system placed on the back side of the sheath. One of the best diving/combat knives actually used in the field.

**ART. OMG-1 FOX O.M.G. KAIMANO COMBAT DIVING KNIFE**

- Blades:** Cobalt vanadium stainless steel N690Co length mm 140 - thickness mm 6, DLC (Diamond Like Carbon) coated blade very high scratch and salt corrosion resistant finishing that will arrive at HRC 70-72 in the surface.
- Handles:** Made with high resistant FORPRENE® material, an elastopolymer with very high thermal proprieties from - 40°C to +150° C, it has very high grip power. The material is also very resistant to salt and acid corrosion and can be used in all wet situations. Total length of the handle is mm 120, including back side stainless steel 304 DLC coated hammer.
- Sheath/clip:** Each sheath is made using Cordura and ballistic nylon. The sheath has an extra pocket that can be easily detached and used separately. In the extra pocket you can find a place for a multi tool or even an extra gun magazine. The sheath is supplied with an leg strap. The modular idea of the sheath gives the possibility to use it in several positions.
